Foreword

The Symposium on Evaluation and Remediation of Low Permeability and Dual Porosity Environments was held in Reno, Nevada on 25 Jan. 2001. The Symposium was sponsored by ASTM Committee D18 on Soil and Rock. The co-chairmen were Martin N. Sara, Environmental Resource Management, Inc. and Lorne G. Everett, Chancellor, Lakehead University; Chief Scientist, Stone & Webster Consultants. They both served as editors for this publication.
Contents

SESSION I: TEST PROCEDURES

Comparison Between Various Field and Laboratory Measurements of the Hydraulic Conductivity of Three Clay Liners—DAVID CAZAUX AND GÉRARD DIDIER 3

Hydraulic Conductivity of a Fractured Aquitard—TAREK ABICHOU, CRAIG H. BENSON, MICHAEL FRIEND, AND XIAODONG WANG 25

Water Potential Response in Fractured Basalt from Infiltration Events—J. M. HUBBELL, E. D. MATTSON, J. B. SISSON, AND D. L. McELROY 38

SESSION II: LABORATORY TO FIELD EVALUATIONS

Pressure-Pulse Test for Field Hydraulic Conductivity of Soils: Is the Common Interpretation Method Adequate?—ROBERT P. CHAPUIS AND DAVID CAZAUX 66

SESSION III: LOW PERMEABILITY ENVIRONMENTS AND REMEDIATION ISSUES

Evaluation of Constant Head Infiltration Test Analysis Methods for Field Estimation of Saturated Hydraulic Conductivity of Compacted Clay Liner—DAVID CAZAUX 101

Impact of Residual NAPL on Water Flow and Heavy Metal Transfer in a Multimodal Grain Size Soil under Saturation Conditions: Implications for Contaminant Mobility—ROSA GALVEZ-CLOUTIER AND JEAN-SÉBASTIEN DUBÉ 126

Transfer of Heavy Metals in a Soil Amended with Geotextiles—
LAURENT LASSABATERE, THIERRY WINIARSKI, AND ROSA GALVEZ CLOUTIER 162

Application of the Colloidal Borescope to Determine a Complex Groundwater Flow Pattern—S. M. NARBUTOVSKIH, J. P. McDONALD, R. SCHALLA, AND M. D. SWEENEY 176
