Flammability and Sensitivity of Materials in Oxygen-Enriched Atmospheres

Eighth Volume

William T. Royals, Ting C. Chou, and Theodore A. Steinberg, editors

ASTM STP 1319
Foreword

This is the eighth in a series of Special Technical Publications produced by ASTM Committee G4 on Flammability and Sensitivity of Materials in Oxygen-Enriched Atmospheres. Unlike the seven preceding volumes of this series, the papers in the eighth volume were not derived solely from the Eighth International Symposium on Flammability and Sensitivity of Materials in Oxygen-Enriched Environments. A series of seminars was held in conjunction with the regular biannual Committee G4 meetings, beginning in 1995, from which eight of the 35 papers presented in this book originate.

This volume, the most voluminous of the series, was edited by symposium chairmen Ting C. Chou, with BOC Group Inc., Murray Hill, NJ; William T. Royals, with United Technologies-Pratt and Whitney, West Palm Beach, FL; and Theodore Steinberg, with the Mechanical Engineering Department at the University of Queensland, Brisbane, Queensland, Australia.
