Printed in the U.S.A.
Foreword

This publication, *Quality and Statistics: Total Quality Management*, contains papers presented at the symposium of the same name held in Atlanta, GA on 4–5 May, 1993. The symposium was sponsored by ASTM Committee E-11 on Quality and Statistics. Milton J. Kowalewski, Jr., of E G & G Rocky Flats, Inc. in Golden, CO presided as symposium chairman and is also the editor of the resulting publication.
Contents

Overview vii

International Competitiveness and Business Excellence—L. M. KUMAR-MISIR 1

Standardization of Policies and Procedures at Commercial Testing and Engineering Co.—R. K. VARDYS 18

Statistical Measurement Control—J. W. LOCKE 30

Where Real Product Quality Starts—T. A. DALY 43

Analyzing Interlaboratory Data According to ASTM Standard E691—J. MANDEL 59

All You Ever Wanted to Know About Control Charts: But Never Asked—B. H. LEVINE AND D. C. McCUNE 71

Quality Control of P/M Parts for Magnetic Applications—K. H. MOYER 84

The Transition from Sampling to SPC—E. G. SCHILLING 94

Overview of Technical and Social Systems in Organizational Change—M. J. KOWALEWSKI, JR., AND C. R. FARRAR 103

Realization of the Projected Impact of a Chemistry Workflow Management System at Bridgeport Hospital—L. H. BERNSTEIN 120

Implementation of a Quality Assurance System in Clothing Establishments—K. W. YEUNG AND G. TAYLOR 133

Statistical Evaluation of Additive Effectiveness in Asphalt Paving Mixtures—W. V. PING 165
Overview

It was a warm and balmy time in Atlanta where 16 total quality individuals presented their dreams, messages, and stories to ASTM members and friends. Dorothy Savini and Scott Orthey provided a warm Atlanta welcome and southern style food in addition to their incomparable planning and coordination success. Nancy Trahey, the ASTM Chairman of the Board opened the E11 Symposium by awarding the ASTM Award of Merit and Fellow recognition to Dr. Ricardo Stone for his contributions and persistence. She was followed by E11 Chairman, Duncan McCune, who presented the Harold F. Dodge Award to Dr. Edward G. Schilling for reflecting the spirit and integrity of his late graduate advisor, Dr. Dodge.

These exciting award presentations set the stage for the 2 day marathon of presentations on Total Quality Management in standardization. Kumar-Misir opened the 16 paper series by describing his global-ready business model. His presentation was both informative and appropriate. Zott followed by telling the International Standards Organization (ISO) registration story as it relates to Underwriter's Laboratories (UL) in the United States and other accreditation bodies worldwide. Vardys set the foundation for the following 13 speakers by emphasizing the necessity to plan, control, and prepare documentation systems.

Locke, President of the American Association for Laboratory Accreditation (A2LA), opened the technical section of the morning by sharing his case-study of statistical measurement control for the evaluation of laboratory test results of automobile parts. Octogenarian, Daly, showed us the importance of formal design review, failure mode effects analysis (FMEA), and fault tree analysis (FTA) procedures. He was followed by Tulay who explained the Energy Program Research Institute (EPRI) guide for sampling procured items for the nuclear industry.

Since Mandel was visiting his homeland overseas, McCune aptly read and interpreted Dr. Mandel's paper on the ASTM Guide for Interlaboratory Studies (E 691) and its computer software capabilities. An additional step for enhancing the application of the standard was proposed for use. Lindow closed day one with examples of construction projects where Total Quality Control (TQC) was not used and should have been used.

Day 2 was opened by McCune and Levine presenting the do's and don'ts of control charts. They were followed by Moyer who shared the frustrations and need for quality standards in the manufacture of magnetic products that were identified as functional throughout our homes and automobiles. His interlaboratory study revealed startling results. He was followed by Schilling's transitional paper and easy to apply ABC plan for initiating, establishing, and maintaining both capability and control of processes.

Farrar and yours truly, the symposium chairman, lightened up the morning in preparation for lunch with a philosophical and practical combination of organizational frames and TQM in a road design agency. Bernstein helped us digest lunch by his after meal tour through the "belly" of the chemistry lab at Bridgeport Hospital in Massachusetts. Winding down the last quarter of the marathon of papers on day 2 was Yeung speaking on the results of surveys and quality assurance systems designed for small clothing establishments in Hong Kong where the expectation of the return to Chinese rule in 1997 has retarded the development of quality systems.

Lau spoke about the advantages of continuous process flow analyzers in the Canadian oil industry, and Ping paved the way for us to understand a research project conducted on
Texas highways.

My personal thanks are due the ASTM staff, the speakers, each of the authors, the superb service of the Hyatt Regency Hotel, the ASTM manager of Acquisitions and Review, Kathy Dernoga, for this special collection of leading edge information in the sciences of quality, statistics, and Total Quality Management.
