Foreword

This publication, *Operating Room and Intensive Care Alarms and Information Transfer*, contains papers presented at the symposium of the same name held in Zurich, Switzerland, on 27 February 1991. The Symposium was sponsored by ASTM Committee F-29 on Anaesthetic and Respiratory Equipment and ISO Committee TC 121 on Anaesthetic and Respiratory Equipment. Dr. John Hedley-Whyte, West Roxbury V.A. Medical Center, Boston, Massachusetts, presided as symposium chairman and was editor of this publication.
Contents

Overview: Problems and Opportunities in Standardization of Information Transfer in Operating Rooms and Intensive Care Units—J. HEDLEY-WHYTE

Requirements of an Ideal System for Operating Room and Intensive Care Alarms and Information Transfer—J. HEDLEY-WHYTE AND D. R. MILAMED

A Survey of Practicing Anesthesiologists on Auditory Alarms in the Operating Room—R. L. GRIFFITH AND B. M. RACIOT

Alarms in an Operative Intensive Care Unit—Response of the Nursing Staff—A. DELLER, F. KONRAD, J. KILIAN, AND B. SCHÜHLE

Medical Information Management: Towards a Life Support System—B. ERIKSSON

The Man/Machine Interface in the Operating Room: An Ergonomic Approach to a Rational Alarm System—L. L. BLUM
