Photocopy Rights

Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the AMERICAN SOCIETY FOR TESTING AND MATERIALS for users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $2.50 per copy, plus $0.50 per page is paid directly to CCC, 27 Congress St., Salem, MA 01970; (508) 744-3350. For those organizations that have been granted a photocopy license by CCC, a separate system of payment has been arranged. The fee code for users of the Transactional Reporting Service is 0-8031-1861-9-93 $2.50 + .50.

Peer Review Policy

Each paper published in this volume was evaluated by three peer reviewers. The authors addressed all of the reviewers' comments to the satisfaction of both the technical editor(s) and the ASTM Committee on Publications.

The quality of the papers in this publication reflects not only the obvious efforts of the authors and the technical editor(s), but also the work of these peer reviewers. The ASTM Committee on Publications acknowledges with appreciation their dedication and contribution to time and effort on behalf of ASTM.

Foreword

This publication, *Electrochemical Impedance: Analysis and Interpretation*, contains papers presented at the symposium of the same name, held in San Diego, CA on 4–5 November 1991. The symposium was sponsored by ASTM Committee G-1 on Corrosion of Metals. John R. Scully, University of Virginia, Center for Electrochemical Science and Engineering, David C. Silverman, Monsanto, and Martin W. Kendig, Rockwell International Science Center, presided as symposium chairmen and are editors of the resulting publication.
Contents

Overview

MODELING AND CORROSION PROCESSES

Impedance Spectra Calculated from Model Polarization Curves—U. BERTOCCI AND R. E. RICKER

Discussion

Specific Aspects of Impedance Measurements in Low Conductivity Media—S. CHECHIRLIAN, M. KEDDAM, AND H. TAKENOUTI

Analyzing Simulated Electrochemical Impedance Spectroscopy Results by the Systematic Permutation of Data Points—P. R. ROBERGE

The Effect of Parasitic Conduction Pathways on EIS Measurements in Low Conductivity Media—K. C. STEWART, D. G. KOLMAN, AND S. R. TAYLOR

APPLICATIONS OF KRAMERS-KRONIG TRANSFORMATIONS

Application of the Kramers-Kronig Relations in Electrochemical Impedance Spectroscopy—P. AGARWAL, M. E. ORAZEM, AND L. H. GARCIA-RUBIO

Kramers-Kronig Transformation in Relation to the Interface Regulating Device—C. GABRIELLI, M. KEDDAM, AND H. TAKENOUTI

Validation of Experimental Data from High Impedance Systems Using the Kramers-Kronig Transforms—B. J. DOUGHERTY AND S. I. SMEDLEY

CORROSION AND INHIBITION

The Impedance Response of Film-Covered Metals—S. TURGOOSE AND R. A. COTTIS

Corrosion Prediction from Circuit Models Application to Evaluation of Corrosion Inhibitors—D. C. SILVERMAN

The Influence of Corrosion Product Film Formation on the Corrosion of Copper-Nickel Alloys in Aqueous NaCl—H. HACK AND H. PICKERING 220

Discussion 236

Discussion 251

Corrosion of Aluminum

Discussion 275

Detection and Monitoring of Localized Corrosion by EIS—F. MANSFELD, Y. WANG, S. H. LIN, H. XIAO, AND H. SHIH 297

Potentiodynamic Polarization and Electrochemical Impedance Spectroscopy for the Statistical Process Control of Aluminum Anodizing—P. R. ROBERGE, E. HALLIOP, AND S. YOUSRI 313

Equivalent Circuit Modeling of Aluminum/Polymer Laminates Using Electrochemical Impedance Spectroscopy—G. R. T. SCHUELLER AND S. R. TAYLOR 328

Discussion 343

Corrosion of Steel in Soil and Concrete

Electrochemical Impedance of a Buried Large Structure—S. SUDO AND S. HARUYAMA 347

Calculation of Extended Counter Electrode Polarization Effects on the Electrochemical Impedance Response of Steel in Concrete—S. C. KRANC AND A. A. SAGÜÉS 365

Discussion 383
Electrochemical Impedance and Harmonic Analysis Measurements on Steel in Concrete—M. I. JAFAR, J. L. DAWSON, AND D. G. JOHN 384

COATINGS ON METALS

Electrochemical Impedance of Coated Metal Undergoing Loss of Adhesion—
M. W. KENDIG, S. JEANJAQUET, AND J. LUMSDEN 407

Analyzing and Interpreting Electrochemical Impedance Spectroscopy Data from Internally Coated Steel Aerosol Containers—W. S. TAIT, K. A. HANDBICH, S. W. TAIT, AND J. W. MARTIN 428

Evaluation of High-Performance Protective Coatings by Electrochemical Impedance and Chronoamperometry—R. D. GRANATA AND K. J. KOVALESKI 450

Discussion 462

Improved Coatings Testing and Evaluation Using Electrochemical Impedance Spectroscopy—P. KAMARCHIK 463
