Remote Sensing and GIS for Site Characterization: Applications and Standards

V. H. Singhroy, D. D. Nebert, and A. I. Johnson, Editors

ASTM Publication Code Number (PCN)
04-012790-38

ASTM
100 Barr Harbor Drive
West Conshohocken, PA 19428-2959
Foreword

Related ASTM Publications

ASTM Standards on Analysis of Hydrologic Parameters and Ground Water Modeling

ASTM Standards on Design and Planning for Ground Water and Vadose Zone Investigations

ASTM Standards on Environmental Sampling, 1995

Compilation of Scopes of ASTM Standards Relating to Environmental Monitoring, 1993
Annual Book of ASTM Standards, Vols. 04.08 and 04.09
Contents

Overview—V. H. Singhroy, D. D. Nebert, and A. I. Johnson 1

KEYNOTE

REMOTE SENSING APPLICATIONS

Digital Elevation Data, Landsat TM and Magnetic Data for Visualization of Geomorphological and Geological Features—Kjell Wester and Bengt Lundén 29

Data Transfer, Necessary Interfaces, and Applications in a Modular Snow Hydrology Modeling System—Albert Rango and Michael F. Baumgartner 38

A Change Detection Methodology for the Amazon Forest Using Multitemporal NOAA/AVHRR Data and GIS—Preliminary Results—Angelica C. Di Maio Mantovani and Alberto W. Setzer 43

A Concept for Remote Sensing Data Selection and Method Selection—Ko B. Fung and M.A. Robson 47

GEOGRAPHIC INFORMATION SYSTEM (GIS)

Integration of a GIS Data Set with Aerial Photography Using GPS for Control Points on the Newlands Project in Nevada—David T. Hansen and Michael Sebhat 66

Basic Data Requirements for Ground-Water GIS Systems—Philip L. Hall 75

The Importance of Undergraduate, Graduate, Technical, and Applied GIS and Remote Sensing Education—Robert O. Bixby 89

Geographical Information Systems (GIS) Application to Analyze Transportation Effects on Mineral Activities in a Developing Country—Ralph Kingston Asabere 93
