Corrosion Effect of Stray Currents and the Techniques for Evaluating Corrosion of Rebars in Concrete

Victor Chaker
EDITOR

ASTM STP 906
Corrosion effect of stray currents and the techniques for evaluating corrosion of rebars in concrete.

(ASTM special technical publication; 906)

"ASTM publication code number (PCN) 04-906000-27."

Includes bibliographies and index.

Foreword

The symposium on the Corrosion Effect of Stray Currents and the Techniques for Evaluating Corrosion of Rebars in Concrete was presented at Williamsburg, VA, 28 Nov. 1984. The symposium was sponsored by ASTM Committee G-1 on Corrosion of Metals. Victor Chaker, Gilbert Associates, Inc., presided as chairman of the symposium and is editor of this publication.

A Note of Appreciation to Reviewers

The quality of the papers that appear in this publication reflects not only the obvious efforts of the authors but also the unheralded, though essential, work of the reviewers. On behalf of ASTM we acknowledge with appreciation their dedication to high professional standards and their sacrifice of time and effort.

Contents

Introduction 1

Historical Background — CHARLES B. SANBORN 3

Corrosion of Steel in Portland Cement Concrete: Fundamental Studies — CARL E. LOCKE 5

Discussion 14

Accelerated Rebar Corrosion When Connected to Lightning Conductors and Protection of Rebars with Needles Diodes Using Atmospheric Electricity — THEODOR SKOULIKIDIS, AZISTARCHO TSAKOPOULOS, AND TONIA MOROPOULOS 15

Application of a Polymeric Anodemesh for Cathodic Protection to a Reinforced Concrete Structure — KENNETH J. DRACHNIK 31

The Determination of the Corrosion Rate of Steel Embedded in Concrete by the Polarization Resistance and AC Impedance Methods — CARMEN ANDRADE, VICTOR CASTELO, CRUZ ALONSO, AND JOSÉ A. GONZALEZ 43

Corrosion Susceptibility of Reinforced Earth Systems: Field Surveys — DAVID WHITING 64

The Use of Anodic Polarization to Determine the Effectiveness of Calcium Nitrite as an Anodic Inhibitor — NEAL S. BERKE 78

Detection and Considerations of Corrosion Problems of Prestressed Concrete Cylinder Pipe — PAUL S. ROTHMAN AND ROBERT E. PRICE 92

X-Ray Permeability of Corrosion Products as a Measure of the Rate of Corrosion of Rebars and of Prediction of Concrete Cracking — THEODOR SKOULIKIDIS, DIMITRIOS MARINAKIS, AND GEORG BATIS 108

Terra Thermaic and Magnesium Oxide with Induced Defects as Additives on Concrete for the Protection of Rebars — THEODOR SKOULIKIDIS, DIMITRIOS MARINAKIS, AND GEORG BATIS 118

Summary 131
