NOTE
The Society is not responsible, as a body, for the statements and opinions advanced in this publication.

Peer Review Policy
Each paper published in this volume was evaluated by three peer reviewers. The authors addressed all of the reviewers' comments to the satisfaction of both the technical editor(s) and the ASTM Committee on Publications.

The quality of the papers in this publication reflects not only the obvious efforts of the authors and the technical editor(s), but also the work of these peer reviewers. The ASTM Committee on Publications acknowledges with appreciation their dedication and contribution of time and effort on behalf of ASTM.

Foreword

This publication, Acoustic Emission: Current Practice and Future Directions, contains papers presented at the symposium on World Meeting on Acoustic Emission held in Charlotte, NC on 20–23 March 1989. The symposium was sponsored by AEWG. Co-sponsoring groups were ASTM Committee E–7 on Nondestructive Testing, ASNT, IEEE, and SEM. Professor Wolfgang Sachse of Cornell University, Dr. James Roget of Nordon and CIE, and Professor Kusuo Yamaguchi of the University of Tokyo, presided as symposium chairman. They are also editors of this publication.
Contents

Overview—W. SACHSE, K. YAMAGUCHI, AND J. ROGET

AE SENSORS AND SYSTEMS

The General Problems of AE Sensors—Y. HIGO AND H. INABA

AE SOURCES AND WAVE PROPAGATION

Development and Future Aspects in AE Source Characterization—M. ENOKI AND T. KISHI

Joule Heating Line and Point AE Sources and the Adhesion of Thin Metal Films—K. Y. KIM AND W. SACHSE

Simultaneous Velocity Tomography and Source Location of Synthetic Acoustic Emission Data—S. C. MAXWELL, R. P. YOUNG, AND D. A. HUTCHINS

Acousto-Ultrasonics: An Update—A. VARY

Theoretical Basis of the Acousto-Ultrasonic Method—M. T. KIERNAN AND J. C. DUKE, JR.

SIGNAL PROCESSING APPROACHES

Acoustic Emission Technology Using Multi-Parameter Analysis of Waveform and Application to GFRP Tensile Tests—K. YAMAGUCHI, H. OYAI, J. JOHKAJI, AND Y. KOBAYASHI

Structural Integrity Evaluation Using AE Techniques—B. R. A. WOOD AND R. W. HARRIS

Solving AE Problems by a Neural Network—I. GRABEC, W. SACHSE, AND E. GOVEKAR

STRUCTURAL MONITORING APPLICATIONS

Periodic Inspection of Compressed Gas Cylinders and Transport Vessels by Using Acoustic Emission Testing—H. M. BARTHÉLÉMY
Detectability of Defects in Reactor Pressure Components by Location and Interpretation of AE-Sources—C. SKLARCZYK AND E. WASCHKIES

DEFORMATION STUDIES

Effect of Pre-Exposure to Water on the Acoustic Emission Behavior of 2091-T3 Al-Li Alloy—F. ZEIDES AND I. ROMAN

Acoustic Emission During Tensile Deformation and Fracture in Austenitic Alloys—B. RAJ AND T. JAYAKUMAR

Relationship Between Acoustic Emission and Flaw Size in Si₃N₄ Ceramics—Y. MORI AND T. KISHI

A Comparison of the Acoustic Emission Generated from the Fracture and Decohesion of Graphite Nodules with Theoretical Predictions—S. H. CARPENTER AND Z. ZHU

Evaluation of Fatigue Crack Growth Rate of Carburized Gear by Acoustic Emission Technique—Y. OBATA, H. KOBAYASHI, K. AOKI, T. YAMAGUCHI, AND K. SHIBATA

NOVEL APPLICATIONS

Characterisation of Dust Impact at Low Velocity by Acoustic Emission—D. J. BUTTLE AND C. B. SCRUBY

Applications of Acoustic Emission Techniques for Diagnosis of Large Rotating Machinery and Mass Production Products—I. SATO, T. YONEYAMA, K. SATO, T. TANAKA, M. YANAGIBASHI, AND K. TAKIKAWA

Tool Monitoring by Acoustic Emission—J. ROGET, P. SOUQUET, M. DESCHAMPS, AND N. GSIB

Monitoring of the Machining Process by Means of Acoustic Emission Sensors—D. A. DORNFELD

GEOTECHNICAL APPLICATIONS

Microseismics and Geotechnical Applications—M. OHTSU

Acoustic Emission/Microseismic Activity at Very Low Strain Levels—B. H. ARMSTRONG AND C. M. VALDES

Acoustic Emission Monitoring and Analysis Procedures Utilized During Deformation Studies on Geologic Materials—X. SUN, H. R. HARDY, JR., AND M. V. M. S. RAO

APPLICATIONS TO COMPOSITE MATERIALS

On the Correlation Between Acoustic Emission and Progression of Matrix Splitting in a Unidirectional Graphite/Epoxy Composite—S. GAFFARI AND J. AWERBUCH

Identification of Fatigue Failure Modes in Carbon Fibre Reinforced Composites with the Energy Discriminating Acoustic Emission Method—M. WEVERS, I. VERPOEST, P. DE MEESTER, AND E. AERNOUDT

Detection of Impact Damage in Composite Bi-Axial Test Specimens by Use of Thermally-Activated Acoustic Emission—J. W. WHITTAKER AND W. D. BROSEY

Acoustic Emission Monitoring of Contact Drying of Southern Pine Veneer—F. C. BEALL
