Peer Review Policy

Each paper published in this volume was evaluated by three peer reviewers. The authors
addressed all of the reviewers’ comments to the satisfaction of both the technical editor(s)
and the ASTM Committee on Publications.

The quality of the papers in this publication reflects not only the obvious efforts of the
authors and the technical editor(s), but also the work of these peer reviewers. The ASTM
Committee on Publications acknowledges with appreciation their dedication and contribution
of time and effort on behalf of ASTM.
Foreword

This publication, *Nondestructive Testing of Pavements and Backcalculation of Moduli*, contains papers presented at the First International Symposium on Nondestructive Testing of Pavements and Backcalculation of Moduli, which was held in Baltimore, Maryland, 29–30 June 1988. The symposium was sponsored by ASTM Committees D-4 on Road and Paving Materials and D-18 on Soil and Rock. A. J. Bush III, USAE Waterways Experiment Station, and G. Y. Baladi, Michigan State University, presided as symposium chairmen and were editors of this publication.
Contents

Overview

Backcalculation of Layer Moduli—State of the Art

Backcalculation of Pavement Layer Properties—R. L. Lytton 7

Nondestructive Testing

Deflection Testing

Reliability Testing of Seven Nondestructive Pavement Testing Devices—R. A. Bentsen, S. Nazarian, and J. A. Harrison 41

Comparison of Two Falling Weight Deflectometer Devices, Dynatest 8000 and KUAB 2M-FWD—J. A. Crovetti, M. Y. Shahin, and B. E. Touma 59

The Multidepth Deflectometer (MDD) System for Determining the Effective Elastic Moduli of Pavement Layers—M. De Beer, E. Horak, and A. T. Visser 70

Using the Multidepth Deflectometer to Verify Modulus Backcalculation Procedures—T. Scullion, R. C. Briggs, and R. L. Lytton 90

Radar Testing

Application of Ground-Penetrating Radar and Infrared Thermography to Pavement Evaluation—F. B. Holt and R. A. Eckrose 105

Surface Wave Testing

Nondestructive Evaluation of Pavements by Surface Wave Method—S. Nazarian and K. H. Stokoe II 119

Influence of Source and Receiver Geometry on the Testing of Pavements by the Surface Waves Method—D. R. Hiltunen and R. D. Woods 138

USAF Wave Propagation NDT Method—M. C. Wang, W. Schauz, J. Amend, and J. L. Greene 155
