Water Vapor Transmission Through Building Materials and Systems: Mechanisms and Measurement

Heinz R. Trechsel and Mark Bomberg, editors
Foreword

The papers in this publication, Water Vapor Transmission Through Building Materials and Systems, were presented at a symposium held in Bal Harbour, Florida, 10 December 1987. The symposium was sponsored by Committee C-16 on Thermal Insulation and Committee E-6 on Performance of Building Constructions. Other sponsoring groups were, D-1 on Paint and Related Coatings and Materials, D-8 on Roofing, Waterproofing, and Bituminous Materials, D-10 on Packaging, D-20 on Plastics, and F-2 on Flexible Barrier Materials. H. R. Trechsel, H. R. Trechsel Associates, and M. Bomberg, Institute for Research and Construction, National Research Council of Canada, are symposium chairmen and editors of this publication.
Contents

Introduction 1

Forty Years of Vapor Barriers—NEIL B. HUTCHEON 5

MECHANISMS

Moisture Transfer Through Materials and Systems in Buildings—ANTON TENWOLDE 11

Vapor Transport Characteristics of Mineral Fiber Insulation from Heat Flow Meter Measurements—MAVINKAL K. KUMARAN 19

Sorption Isotherms: A Catalog and a Data Base—KURT K. HANSEN 28

FIELD OBSERVATIONS

Moisture Transport in Walls: Canadian Experience—JIM H. WHITE 35

Discussion 50

Condensation Problems in a Refrigerated Storage Building—A Case History—PETER E. NELSON 51

MEASUREMENT

Water Vapor Transmission and Moisture Accumulation in Polyurethane and Polyisocyanurate Foams—NORMAN V. SCHWARTZ, MARK BOMBERG, AND MAVINKAL K. KUMARAN 63

Results of the 1985 Round-Robin Test Series Using ASTM E 96-80—MURRAY TOAS 73

Discussion 90
Results of a Water Vapor Transmission Round-Robin Test Using Cup Methods—
KURT K. HANSEN AND NIELS H. BERTELESEN 91

Electric Field Probes for Quantitative Moisture Measurements in Building
Materials—GEORGE E. COURVILLE, JAMES O. HYLTON, WILLIAM P. MURRAY,
ALLAN BLALOCK, AND CARL J. REMENYIK 101

Measurement of Unsaturated Wood Permeability by Transient Flow Methods—
CRAIG A. SPOLEK AND FARID PIROOZMANDI 114

Variability of Water Vapor Transmission Rates of Extruded Polystyrene Using
ASTM E 96-80 (Desiccant Method)—ALISA R. HOFFEE 123

Review of Correlations of Infrared Detection Techniques for Water Vapor
Transmission Rates (WVTR) with ASTM E 96-80 and Some Approaches to
Gravimetric Calibration—LEROY PIKE 134

Summary of Symposium Papers—WAYNE P. ELLIS 141

Panel Session: Discussion and Recommendations—WAYNE P. ELLIS 151

Testing Water Vapor Transmission: Unresolved Issues—MARK BOMBERG 157
