Foreword

The papers in this publication, *Future Fuels for General Aviation*, were presented at a symposium on Future Fuels for General Aviation Intermittent Combustion held 29 June 1988 in Baltimore, Maryland. The symposium was sponsored by ASTM Committee D-2 on Petroleum Products and Lubricants. Kurt H. Strauss, Petroleum Fuels Consultant, and Cesar Gonzalez, Cessna Aircraft Company, are editors of this publication.
Contents

Introduction 1

BACKGROUND

Manufacturing Aviation Gasoline—ROBERT J. CREEK 5

Discussion 15

MOTOR GASOLINE USE IN AIRCRAFT

Aircraft Field Experience with Automotive Gasoline in the United States— 19
HARRY C. ZEISLOFT

Field Experience with Type Certificated Civil Aircraft Operated on Motor
Gasolines and Worldwide Survey of Motor Gasoline Characteristics—
PAUL O. PENDLETON 38

Automotive Gasoline—A Fuel for Modern Aircraft Piston Engines—
JOACHIM SCHMAUDER 56

ALTERNATIVE FUEL USE IN AIRCRAFT

The Performance of Alternate Fuels in General Aviation Aircraft—
RICHARD WARES AND AUGUSTO M. FERRARA 79

Ethanol and Methanol in Intermittent Combustion Engines—EDMUND L. EVELETH
103

Investigations into Gasoline/Alcohol Blends for Use in General Aviation
Aircraft—AUGUSTO M. FERRARA 116

FUTURE FUEL REQUIREMENTS

Panel Discussion: Future Fuel Requirements as Seen by Fuel Suppliers—
KURT H. STRAUSS 141

Panel Discussion: Future Fuel Requirements as Seen by Engine
Manufacturers—KURT H. STRAUSS 142
