Laser Techniques in Luminescence Spectroscopy

Tuan Vo-Dinh and DeLyle Eastwood, editors
Contents

Overview

Laser Fluorescence Fingerprints of Environmental Materials—A. MELLONE, B. W. SMITH, J. A. VERA, AND J. D. WINEFORDNER

Techniques and Applications of Two-Photon Spectroscopy of Inorganic Solids—D. S. McCLURE

Laser Excited Fluorescence in Criminalistics—E. R. MENZEL

Laser Induced Fluorescence and Ionization Techniques for Combustion Diagnostics—B. E. FORCH, J. B. MORRIS, AND A. W. MIZIOLEK

Fluorescence Spectroscopy in the Analysis of Deoxyribonucleic Acid (DNA) Adducts—J. M. HAYES AND G. J. SMALL

Temperature and Laser Intensity Effects in Highly Resolved Fluorescence Spectra of Tetracene in Cryogenic Matrices—N. H. VELTHORST, C. GOOIJER, AND J. W. HOFSTRAAT

Luminescence and Thermal Lensing in Micellar and Related Media—C. D. TRAN

Laser Photolytic Fragmentation-Fluorescence Spectrometry of Nonfluorescent Organic and Organometallic Molecules—J. G. JINKINS, J. SCHENDEL, AND E. L. WEHRY

Laser Induced Luminescence Spectroscopy on Solid Substrates: An Overview—T. VO-DINH
Laser Based Fluorescence Methods for Materials Science—J. C. WRIGHT 144

Subattomole Amino Acid Analysis by Laser-Induced Fluorescence: The Sheath Flow Cuvette Meets Capillary Zone Electrophoresis—Y.-F. CHENG AND N. J. DOVICH 151

Foreword

The papers in this publication, *Laser Techniques in Luminescence Spectrography*, were presented at a Symposium on Laser-Based Approaches in Luminescence Spectroscopy held in Boston, Massachusetts, 30 Oct.-4 Nov. 1988 at the FACSS XV Meeting of the Federation of Analytical Chemistry and Spectroscopy Societies. This symposium was co-sponsored by the ASTM Subcommittee E13.06 on Molecular Luminescence and by the Department of Energy, Office of Health and Environmental Research, under contract DE-AC05-84OR21400 with Martin Marietta Energy Systems, Inc. Tuan Vo-Dinh, Oak Ridge National Laboratory, Oak Ridge, Tennessee, and DeLyle Eastwood, Lockheed Engineering & Sciences Company, Las Vegas, Nevada, served as symposium chairpersons and as the editors of this publication.
Acknowledgments

This book is the result of the efforts of many people. First, among them are the many distinguished invited speakers of the symposium, who, by their dedication and hard work, provided the main substance of this book.

The editors wish also to thank the technical reviewers, the staff at ASTM, and Ms. J.B. Cooper at Oak Ridge National Laboratory for their assistance in the organization of the symposium and the preparation of this publication. The sponsorship of the ASTM Subcommittee E13.06 on Molecular Luminescence and of the Department of Energy, Office of Health and Environmental Research, under contract DE-AC05-84OR21400 with Martin Marietta Energy Systems, Inc., is gratefully acknowledged.
