Foreword

The ASTM Symposium on Advances in Fatigue Lifetime Predictive Techniques was held on 24 April 1990 in San Francisco, California. ASTM Committee E-9 on Fatigue sponsored the event.

The symposium chairmen and editors of this volume were M. R. Mitchell, Rockwell International, Science Center, Thousand Oaks, California, and R. W. Landgraf, Virginia Polytechnic Institute and State University, Blacksburg, Virginia.
Contents

Overview

GENERAL APPROACHES

Fatigue Mechanics: An Assessment of a Unified Approach to Life Prediction—
J. C. NEWMAN, JR., E. P. PHILLIPS, M. H. SWAIN, AND R. A. EVERETT, JR.

A Fracture Mechanics Based Model for Cumulative Damage Assessment As Part of
Fatigue Life Prediction—M. VORMWALD, P. HEULER, AND T. SEEGER

ELEVATED TEMPERATURE PHENOMENA

Thermo-Mechanical Fatigue Life Prediction Methods—H. SEHITOGLU

Evaluation of the Effect of Creep and Mean Stress on Fatigue Life Using a Damage
Mechanics Approach—N. M. ABUELFOUTOUH

Cumulative Creep-Fatigue Damage Evolution in an Austenitic Stainless Steel—
M. A. McGAW

Application of a Thermal Fatigue Life Prediction Model to High-Temperature
Aerospace Alloys B1900 + Hf and Haynes 188—G. R. HALFORD,
J. F. SALTSMAN, M. J. VERRILLI, AND V. ARYA

Thermomechanical and Bithermal Fatigue Behavior of Cast B1900 + Hf and
Wrought Haynes 188—G. R. HALFORD, M. J. VERRILLI, S. KALLURI,
F. J. RITZERT, R. E. DUCKERT, AND F. A. HOLLAND

Elevated Temperature Crack Growth in Aircraft Engine Materials—T. NICHOLAS
AND S. MALL

SPECTRUM LOADING

Near-Threshold Fatigue Crack Growth Prediction under Spectrum Loading—
R. SUNDER

Contribution of Individual Load Cycles to Crack Growth under Aircraft Spectrum
Loading—R. SUNDER

Fatigue Crack Growth from Narrow-Band Gaussian Spectrum Loading in 6063
Aluminum Alloy—P. S. VEERS AND J. A. VAN DEN AVYLE
Modeling High Crack Growth Rates under Variable Amplitude Loading—
D. J. DOUGHERTY, A. U. DE KONING, AND B. M. HILLBERRY 214

MULTIAXIAL BEHAVIOR

A Multiaxial Fatigue Life Estimation Technique—J. A. BANNANTINE AND D. F. SOCIE 249

Small Crack Growth in Multiaxial Fatigue—S. C. REDDY AND A. FATEMI 276

Failure Modes in a Type 316 Stainless Steel under Biaxial Strain Cycling—
S. Y. ZAMRIK, D. C. DAVIS, AND P. J. KULOWITCH 299

Nonproportional Fatigue of Welded Structures—A. SILJANDER, P. KURATH, AND F. V. LAWRENCE, JR. 319

APPLICATIONS

Damage Evaluation in Composite Materials Using Thermographic Stress Analysis—D. ZHANG AND B. I. SANDOR 341

Fatigue Life Prediction and Experimental Verification for an Automotive Suspension Component Using Dynamic Simulation and Finite Element Analysis—W. K. BAEK AND R. I. STEPHENS 354

Plasticity and Fatigue Damage Modeling of Severely Loaded Tubing—S. M. TIPTON AND D. A. NEWBURN 369

Electric-Potential-Drop Studies of Fatigue Crack Development in Tensile-Shear Spot Welds—M. H. SWELLAM, P. KURATH, AND F. V. LAWRENCE 383

Life Prediction of Circumferentially Grooved Components under Low-Cycle Fatigue—K. HATANAKA, T. FUJIMITSU, S. SHIRAISHI, AND J. OMORI 402

Reliability Centered Maintenance for Metallic Airframes Based on a Stochastic Crack Growth Approach—S. D. MANNING, J. N. YANG, F. L. PRETZER, AND J. E. MARLER 422

On the Prediction of the Fatigue Propagation of Semi-Elliptical Defects—
W. O. SOBOYEJO 435

Analytical and Experimental Investigation of Fatigue in Lap Joints—
D. V. SWENSON, C. CHIH-CHIEN, AND T. G. DERBER 449
Fatigue Lifetime Monitoring in Power Plants—P. C. RICCARDELLA, A. F. DEARDORFF, AND T. J. GRIESBACH 460

Fatigue Analysis Techniques for Vintage Steam Turbine/Generator Components—H. R. JHANSALE AND D. R. McCANN 474
