Residual and Unspecified Elements in Steel

Melilli/Nisbett, editors
Residual and Unspecified Elements in Steel

Albert S. Melilli and Edward G. Nisbett, editors
Foreword

The Symposium on Residual and Unspecified Elements in Steel was held on 11-13 Nov. 1987 at Bal Harbour, FL. The symposium was sponsored by ASTM Committee A-1 on Steel, Stainless Steel, and Related Alloys. Albert S. Melilli, Raytheon Company, and Edward G. Nisbett, Consultant, served as chairmen of the symposium and are editors of the resulting publication.
Contents

Overview

KEYNOTE ADDRESS

Service Experience Related to Unspecified Elements—GEORGE J. SCHNABEL 5

STEEL MELTING

Residual Problems and the Scrap Industry—DANIEL A. PFLAUM 11
Discussion 24

Some Practical and Economic Aspects of Residual Element Control in Engineered Bar Products—BARRY M. GLASGAL 26

Production of Super Clean Steels—Deoxidation Mechanism During Ladle Refining—WILFRIED MEYER, ADOLF KUCHARZ, AND GÜNTER HOCHÖRTLTER 38
Discussion 47

SOLIDIFICATION AND SUBSEQUENT PROCESSING

Effect of Total Residual Content (Cu+Cr+Ni) on the Machinability of AISI 1215 Steel—HIROSHI YAGUCHI, DEBANSHU BHATTACHARYA, AND MASATO YANASE 51
Discussion 65

HEAT TREATMENT, MICROSTRUCTURE, AND INCLUSION MORPHOLOGY

Inclusion Control in Calcium Treated Steels—J. SAEIL, F. LEROY, H. GAYE, AND C. GATELLIER 69

PROPERTIES

The Role of Trace Elements in a Martensitic 12% Chromium Steel—P. ANDRE COULON 83

Temper Embrittlement Susceptibility and Toughness of A 508 Class 3 Steel—ALI-ASGHAR TAVASSOLI, PIERRE SOULAT, AND ANDRÉ PINEAU 100
Discussion 113

The Effect of Residual Elements on the Tensile Strength of Heavy Carbon Steel Forgings, Heat Treated for Optimum Notch Toughness—EDWARD G. NISBETT 114
Discussion 123

The Effect of Boron, Copper, and Molybdenum Residuals on the Corrosion Resistance of Type 304 Stainless Steel—J. R. KEARNS, M. J. JOHNSON, G. AGGEN, AND W. D. EDSALL 150

Discussion 163

WELDING, PREHEATING, AND POSTWELD HEAT TREATING

The Influence of Current Supply Type on the Composition, Microstructure, and Mechanical Properties of C-Mn and C-Mn-Ni Shielded Metal Arc Welds—DAVID J. ABSON 169

Influence of Low and Ultra Low Sulfur Contents on Weldability of Ferritic Steels—PHILLIPPE BOURGES, REGIS BLONDEAU, AND LUCIEN CADIOU 192

The Influence of Residual Copper in Annealed and Postweld Heat Treated 2-1/4Cr-1Mo Steel—RICHARD L. BODNAR, BRUCE L. BRAMFITT, AND RAYMOND F. CAPPELLINI 202

Discussion 231

Embrittlement of a Copper Containing Weld Metal—ROBERT J. CHRISTOFFEL AND ALAN J. SILVIA 232

The Influence of Current Supply Type and Arc Length on C-Mn, C-Mn-Ni, and C-Mn-Ti-B Shielded Metal Arc Deposit Nitrogen and Oxygen Contents—DAVID J. ABSON 243

Discussion 260

A Newly Developed Ti-Oxide Bearing Steel Having High HAZ Toughness—KOICHI YAMAMOTO, SHOUICHI MATSUDA, TOSHIKI HAZE, RIKIO CHIIWA, AND HIROSHI MIMURA 266

The Effect of Phosphorus on the Mechanical Properties of X-70 Line Pipe Steel—B. M. KAPADIA 285

Discussion 299
