Foreword

The papers in this publication, *Applications of Automation Technology to Fatigue and Fracture Testing*, were presented at a symposium held in Kansas City, Missouri, 22–23 May 1989. The symposium was sponsored by ASTM Committees E9 on Fatigue and E24 on Fracture Testing. Arthur A. Braun, MTS Systems Corporation, Noel E. Ashbaugh, University of Dayton, and Fraser M. Smith, Sarcos Research Corporation, presided as co-chairmen of the symposium and are coeditors of this publication.
