Peer Review Policy

Each paper published in this volume was evaluated by three peer reviewers. The authors addressed all of the reviewers' comments to the satisfaction of both the technical editor(s) and the ASTM Committee on Publications.

The quality of the papers in this publication reflects not only the obvious efforts of the authors and the technical editor(s), but also the work of these peer reviewers. The ASTM Committee on Publications acknowledges with appreciation their dedication and contribution of time and effort on behalf of ASTM.
Foreword

The Eighth Conference on Composite Materials: Testing and Design was held 29 April–1 May 1986 in Charleston, South Carolina. ASTM Committee D-30 on High Modulus Fibers and Their Composites sponsored the conference. John D. Whitcomb, NASA Langley Research Center, served as conference chairman and editor of this publication. Most of the papers presented are included in this volume, which complements the first, second, third, fourth, fifth, sixth, and seventh conference publications—ASTM STP 460, ASTM STP 497, ASTM STP 546, ASTM STP 617, ASTM STP 674, ASTM STP 787, and ASTM STP 893, Composite Materials: Testing and Design.
