NOTE

The Society is not responsible, as a body, for the statements and opinions advanced in this publication.

Peer Review Policy

Each paper published in this volume was evaluated by three peer reviewers. The authors addressed all of the reviewers' comments to the satisfaction of both the technical editor(s) and the ASTM Committee on Publications.

The quality of the papers in this publication reflects not only the obvious efforts of the authors and the technical editor(s), but also the work of these peer reviewers. The ASTM Committee on Publications acknowledges with appreciation their dedication and contribution of time and effort on behalf of ASTM.

Foreword

The symposium on Building Sealants: Materials, Properties, and Performance was held in Fort Lauderdale, Florida, on 31 Jan.–1 Feb. 1990. ASTM Committee C-24 on Building Seals and Sealants sponsored the symposium. Thomas F. O’Connor, Smith, Hinchman & Grylls Associates, Inc., served as chairman of the symposium and editor of the resulting publication.
Contents

Overview 1

STRUCTURAL SEALANT GLAZING

Resistance of Structural Silicones to Creep Rupture and Fatigue—
L. BOGUE SANDBERG AND AMY E. RINTALA 7

Sealant Stresses in Structural Glazing: A Mathematical Model—
C. V. GIRIJA VALLABHAN AND GEE DAVID CHOU 22

Changes in Seal Shapes of Structurally Glazed Insulating Glass Units—
JAMES R. BAILEY, JOSEPH E. MINOR, AND RICHARD W. TOCK 42

Structural Silicone Sealant Requirements for Attaching Stone Panels for Exterior
Applications—LAWRENCE D. CARBARY 53

Comparison of European and U.S. Testing/Qualification Procedures for Structural
Glazing Silicone Sealants—JEAN IKER AND ANDREAS T. WOLF 67

Structural Glazing from a Curtain Wall Designer’s Perspective—LEON S. JACOB
AND BRAD. JOHANSON 79

MOVEMENT CAPACITY OF SEALANTS

Sealant Stresses in Tension and Shear—FRANKLIN W. SHISLER III AND
JEROME M. KLOSOWSKI 95

Behavior of Fillet Sealant Joints—JAMES C. MYERS 108

Experimental Work Carried Out in Support of the Development of an International
Standard on Movement Capability of Sealants—ANDREAS T. WOLF 122

Design of Sealant Joints—THOMAS F. O’CONNOR 141

LABORATORY INVESTIGATION

Temperature and Moisture Effects on the Engineering Properties of Silicone
Sealants—RICHARD W. TOCK 167

Adhesive Properties of Silicone Sealants—W. S. GUTOWSKI 174
