Index

A
Aluminum
   As deoxidizer of steel, 151-154, 158-161
   Forms available for steel deoxidation, 154-156
   Submergence of in liquid steel, 63
   Recovery of in liquid steel, 153
ASTM, Committee A-9 on Ferroalloys, 3-131

B
Bulk density, of ferroalloys, 200-201

C
Calcium
   As flux for alumina, 69-73
   Silicon, for ladle injection, 69-71
Cast iron, classes of, 126
Chemical control of steel composition, 88-90
Chill factor, of ferroalloys, 63-68, 200-201
Chromium alloys, 52, 55-58
   Gas contents of, 73
Columbium, as strengthener of steel, 185-190
Compacted graphite, 111
Compacted graphite cast iron
   Production of, 116-117
   Properties of, 116-123
Cooling effect, of ferroalloys, 63-68, 200-201

D
Density, of ferroalloys, 61-63, 200-201
Deoxidation of steel, by aluminum, 158-160
Desulfurization of steel, by ladle injection, 68-73
Ductile iron, 137-142

E
Efficiency (recovery) of ferroalloys, 88, 153, 174

F
Ferroaluminum
   Behavior of in liquid steel, 163-167
   Practice of use, 165-167
   Properties of, 161-163
Ferrocolumbium, behavior of in liquid steel, 175-176
Ferrosilicons, production of, 50
Ferrotitanium, 148-150
Free machining steels, 191-193
Friability, of ferroalloys, 5-6

G
Gas contents, of ferroalloys, 71-73
Grain size, of steels, 188-190
Graphite in cast iron
   Classification of, 128-131
   Shape variation of, 115
Hardenability, of steel, 181
High-strength low-alloy steels, production of, 170-177
Hydrogen cracking control, use of rare earth metals for, 103

Ingot molds, iron for, 110-114
Injection methods, of ferroalloys, 65-71
Inoculation, of cast iron, 114-116, 129-136
Input control, of ferroalloys, 88
International Standards Organization, 32-39

Killed steels, aluminum additions to, 152

Ladle additions, of rare earth metals, 104-105
Ladle injection, of ferroalloys, 65-71
Lead, use of as alloying element in steel, 193

Magnesium, use of in production of ductile cast iron, 138-142
Manganese alloys, 52, 55-56
Gas contents of, 72
Melter's factor, 88
Melting range, of ferroalloys, 200-201
Mold additions, of rare earth metals, 104-107
Molds, iron for, 110-114
Mishmetal (rare earth metals), 104

National Defense Stockpile, of ferroalloys, 41-48
Nickel alloys production, control of ferroalloys for, 95-98
Niobium (see Columbium)
Nitrogen, use of as alloying element in steel, 195-196
Nitrogenized ferroalloys, 196
Nodular iron, 137-142
Nodules, as source of alloying metals, 79
Nuclear energy applications
Of nickel alloys, 93
Specifications of materials for, 94

Ocean nodules (see Nodules)
Oxygen, in steel, 151, 158-161

Phosphorus, use of as alloying element in steel, 194
Producers, of ferroalloys, 49
Production of ferroalloys, trends of, 53

Quality control, of ferroalloys by user, 84-98, 177-178

Rare earth metals
Addition practice of, 100-108
Treatment, of cast irons, 114, 142
Rare earth silicide, 103-104
Recovery (efficiency) of ferroalloys, 88, 153, 174
Rimmed steels, aluminum additions to, 152
