Aquatic Toxicology and Hazard Assessment

EIGHTH SYMPOSIUM

Bahner/Hansen, EDITORS

ASTM
STP 891
Foreword

The Eighth Symposium on Aquatic Toxicology was presented at Fort Mitchell, KY, on 15-17 April 1984. The symposium was sponsored by ASTM Committee E-47 on Biological Effects and Environmental Fate. Rita Comotto Bahner, Association of Official Analytical Chemists, and David J. Hansen, U.S. Environmental Protection Agency, served as chairmen of the symposium and as editors of this publication.

A Note of Appreciation
to Reviewers

The quality of the papers that appear in this publication reflects not only the obvious efforts of the authors but also the unheralded, though essential, work of the reviewers. On behalf of ASTM we acknowledge with appreciation their dedication to high professional standards and their sacrifice of time and effort.

Introduction 1

Keynote Addresses

Scientific Considerations in the Legislative Arena—
CONGRESSMAN RICHARD DURBIN 7

Scientific Considerations in the International Arena—
CHRISTOPHER M. LEE 15

The Use of Scientific Data by Specific Legislative Mandates

Clean Water Act Update: A New Role for Toxicology—PETER L. WISE 29

Protection: Single Species, Populations, or Ecosystems—A Debate

What Industry Is Doing to Protect Aquatic Life—
HOWARD C. ALEXANDER AND JOE A. QUICK, JR. 37

Water Quality Criteria: Protection of Use Perspective—
FRANK E. GOSTOMSKI 45

Research Needs in Environmental Science—A Panel Discussion

Research Needs for Rapid Assessments of Chronic Toxicity—
WESLEY J. BIRGE AND JEFFREY A. BLACK 51

Research Needs in Validating and Determining the Predictability of Laboratory Data to the Field—TERENCE P. BOYLE 61

Multispecies Tests: Research Needs to Assess the Effects of Chemicals on Aquatic Life—JOHN P. GIESY 67
Research Needs in Developing Structure Activity Relationships—
ROBERT L. LIPNICK

Correlations of Laboratory and Field Data

Biological Effects of Continuous and Intermittent Dosing of Outdoor Experimental Streams with Chlorpyrifos—JOHN EATON,
JACK ARTHUR, ROGER HERMANUTZ, RICHARD KIEFER,
LEN MUELLER, RICHARD ANDERSON, RUSSELL ERICKSON,
BETH NORDLING, JOHN ROGERS, AND HAP PRITCHARD

Acclimation as a Factor Influencing Metal Criteria—GARY A. CHAPMAN

A New Approach for Regulating Iron in Water Quality Standards—
PAUL H. LOEFFELMAN, JOHN H. VAN HASSAL,
TIMOTHY E. ARNOLD, AND JOHN C. HENDRICKS

Comparison of QSAR Predictions with Fish Toxicity Screening Data for 110 Phenols—ROBERT L. LIPNICK, CHARLENE K. BICKINGS,
DAVID E. JOHNSON, AND DAVID A. EASTMOND

Field Confirmation of a Laboratory-Derived Hazard Assessment of the Acute Toxicity of Fenthion to Pink Shrimp, Penaeus duorarum—PATRICK W. BORTHWICK, JAMES R. CLARK,
RICHARD M. MONTGOMERY, JAMES M. PATRICK, JR., AND EMILE M. LORES

Aquatic Toxicology Concepts, Including Time/Toxicity Concentration Prediction Techniques

Time/Toxicity Relationships in Short-Term Static, Dynamic, and Plug-Flow Bioassays—HOWARD C. BAILEY, DAVID H. W. LIU,
AND HAROLD A. JAVITZ

The Acute Toxicity of Chlorine on Freshwater Organisms: Time-Concentration Relationships of Constant and Intermittent Exposures—MING P. WANG AND SUE A. HANSON

Brood Size and Neonate Weight of Daphnia magna Produced by Nine Diets—U. M. COWGILL, D. L. HOPKINS, S. L. APPLEGATH,
I. T. TAKAHASHI, S. D. BROOKS, AND D. P. MILAZZO
