Foreword

The Symposium on Fiber, Matrix, and Interface Properties was held 14 November 1994 in Phoenix, Arizona. ASTM Committee D-30 on High Modulus Fibers and Their Composites sponsored the symposium. Christopher J. Spragg, Amoco Performance Products, Inc., and Lawrence T. Drzal, Michigan State University, presided as cochairmen and are editors of this publication.
Contents

Overview 1

Nonlinear Elastic Characterization of Carbon Fibers—P. ARSENOVIC 2

Methods of Determining the Temperature Dependence of Primary Creep—
C. A. LEWINSOHN, C. E. BAKIS, AND R. E. TRESSLER 9

Interfacial Measurements and Fracture Characteristics of Single and Multi-
Fiber Composites by Remote Laser Raman Microscopy—C. GALIOTIS,
V. CHOHAN, A. PAIPETIS, AND C. VLATTAS 19

The Use of Interfacial Test Methods in Composite Materials Development—
M. J. PITKETHLY 34

Analysis of Stress Transfer from the Matrix to the Fiber Through an Imperfect
Interface: Application to Raman Data and the Single-Fiber Fragmentation
Test—J. A. NAIRN, Y. C. LIU, AND C. GALIOTIS 47

Modeling the Dynamic Response of the Fiber/Matrix Interphase in Continuous

Direct Observation of Debonding in Fiber Pull-Out Specimens—M. R. PIGGOTT
AND YU XIONG 84

Interlaboratory Study of Adhesion Using Voltage Contrast XPS—J. D. MILLER,
G. W. ZAJAC, AND T. NGUYEN 92

Effect of Temperature and Fiber Coating on the Strength of E-Glass Fibers
and the E-Glass/Epoxy Interface for Single-Fiber Fragmentation Samples
Immersed in Water—C. R. SCHULTHEISZ, C. L. SCHUTTE, W. G. MCDONOUGH,
K. S. MACTURK, M. MCAULIFFE, S. KONDAGUNTA, AND D. L. HUNTSON 103

A New Technique to Study the Interfacial Strength and Transverse Cracking
Scenario in Composite Materials—C. WOOD AND W. BRADLEY 132

Characteristics of Fatigue Life and Damage Accumulation of Short-Fiber
Reinforced Polymer Composites—A. T. YOKOBORI, JR., H. TAKEDA, T. ADACHI,
J. C. HA, AND T. YOKOBORI 152

Fiber/Matrix Interface Studies Using Fragmentation Test—J. P. ARMISTEAD
AND A. W. SNOW 168

Fiber/Matrix Interface Effect on Monotonic and Fatigue Behavior of
Unidirectional Carbon/Epoxy Composites—B. LARGE-TOUMI, M. SALVIA,
AND L. VINCENT 182
