FOREWORD

The papers and discussions appearing in this volume were presented as a Symposium on Paint and Paint Materials, held in conjunction with the sixth regional meeting of the American Society for Testing Materials at Philadelphia, Pa., on March 6, 1935, under the auspices of the Philadelphia District Committee. The papers cover almost all phases of the paint, varnish and lacquer industry and the various subjects are treated in a comprehensive, technical manner so that the papers and discussions should be of great interest to everyone, including consumers of paint, varnish and lacquer products, as well as those who produce them.

The technical program was sponsored by the Society's Committee D-1 on Preservative Coatings for Structural Materials. The committee immediately in charge of the technical program consisted of the following:

R. L. Hallett (Chairman), Chemist, National Lead Co.
W. R. Fuller, Technical Director, Pratt & Lambert, Inc.
H. A. Gardner, Chemical Engineer, The Institute of Paint and Varnish Research.
H. A. Nelson, Chief, Paint and Ceramic Research Division, New Jersey Zinc Co.
W. T. Pearce, The Resinous Products and Chemical Co., Inc.

The presiding officers of the sessions at the symposium were:

Honorary Chairman: G. B. Heckel, Editor-Publisher, Drugs, Oils and Paints.
Chairman: P. H. Walker, Acting Chief, Chemistry Division, National Sand and Gravel Assn.
Co-Chairman: R. L. Hallett, Chemist, National Lead Co.
Note.—The Society is not responsible, as a body, for the statements and opinions advanced in this publication.
CONTENTS

Looking into the Future—H. A. Gardner ............................................ 1
Discussion ................................................................... 11
Preparation, Use and Abuse of Specifications for Paint Materials—P. H. Walker ........ 13
Discussion ................................................................... 21
Protective and Decorative Coatings for Railway Passenger Car Equipment—A. M. Johnsen. 27
Discussion ................................................................... 34
Paint Testing—C. D. Holley....................................................... 39
Discussion ................................................................... 45
Varnish Testing—Wayne R. Fuller.................................................. 47
Discussion ................................................................... 56
Lacquer Testing—H. E. Eastlack................................................... 57
Drying Oils—S. O. Sorensen........................................................ 66
Discussion ................................................................... 72
Zinc Pigments—E. H. Bunce....................................................... 73
Lead Pigments—R. L. Hallett and C. H. Rose ....................................... 81
Titanium Pigments—I. D. Hagar................................................... 88
Discussion on Zinc, Lead and Titanium Pigments.. 96
The Mineral Earth Colors and Synthetic Iron Oxides—J. W. Ayers ..................... 107
Chemical Colors—A. F. Brown..................................................... 116
Discussion ................................................................... 126
Natural and Synthetic Resins—W. T. Pearce......................................... 128
Discussion ................................................................... 136
Lacquer Solvents and Volatile Thinners—R. M. Carter ................................ 138
Discussion ................................................................... 144
Turpentine and Petroleum Distillates as Thinners for Varnish and Paint—J. M. Schantz.. 146
Discussion ................................................................... 149
