Subject Index

A

Acceleration-deceleration tests, 167
Aerospace engines, 354, 374, 391
Aircraft engines, 131, 335, 354, 409, 447
Aircraft frame, 460
AISI 52100, 279
Alumina inclusion, 70
AMS 5618, 437
AMS 5630, 437
AMS 5898, 131, 354, 447
AMS 6278, 131
AMS 6491, 131
Annealing, spheroidized, 249
ASTM Subcommittee A01.28 on Bearing Steels, 3
ASTM standards, 39
A 295, 3, 27
A 485, 3
A 534, 3
A 555, 3
A 866, 3
A 892, 3
B 117, 460
E 45, 13
E 1122, 13
E 1245, 13
ES-5a, 3
G 44, 460
Austenite, retained, 279, 293
Automatic EDX-analysis, 231
Automotive applications, 279
Automotive engine accessory belts, 167

Bainite, 87
BG 42, 471
Billet stage, porosities, 27
Brittle flaking, 167

B

C

Carbides, 249, 265, 321
distributions, 471
spheroidal, 321
structure, 437
Carbon dioxide lasers, 471
Carbo-nitride heat treatment, 293
Carbon, high, chromium bearing steel, 202
Carbon nitriding, 202, 279
Carbon steel, 293
Carbon through hardening steel, 279
Carburizing stainless steel, 374, 409, 460
Case hardening, 293, 354
Chromium carbides, 471
Chromium, carbon, steel, 202, 216, 374, 437
Chromium content, 437, 460
Chromium molybdenum steel, 391
Cleanliness, 39, 55, 189, 202, 249
assessment, 30
macroleanliness, 231
super clean bearing steel, 87
Compressive stress, 321
Continuous casting, 216, 231, 249
Cooling action, during quenching, uneven, 265
Copper sulfate exposure resistance, 437
Corrosion resistance, 374, 391, 409, 437, 447
Corrosion test, alternate immersion, 460
Crack examination, 511
Crack growth, 152
Crack initiation points, 216
Crack nucleation, 55, 109
Crack propagation, 55
Cronidur 30, 131, 354, 447
CSS-42L, 374

D

Deformation, 307
   micro-plastic, 152
Deoxidation products, 27
Diffraction-line width, 152
Dimensional stability, 293, 335
Dislocations, 109
Dissolution, 265
Distortion, 265
Drive belts, engine accessory, 167
Durability, 307

E

Eddy current, 511
Elastic properties, 511
Electric furnace, 3, 335
Electron beam remelting, 87

F

Fatigue
   life, 55
   limit, 87
   rolling contact, 109, 152
      behavior prediction, 39
      carbon steel, 279, 293
      endurance limit estimation, 131
      laser glazings, 471
      life, 202, 216, 249, 391
      life, austenite effects on, 265
      life prediction, quantitative, 55
   material response, 152
   nitrogen alloyed, 447
   SAE 52100, 349
   short crack behavior, 70
   superlattice steel, 499
   rotating bending, 202
   spalling fatigue failure, 152
   testing, 124, 189
Finite element method, 70
Flaking, 249
   brittle, 167
Forging techniques, 336
   440 C stainless steel, 460, 471
   440 N-DUR, 437
Fracture load, 460
Fracture toughness, 293, 335, 374, 409

G

Grease, 167

H

Hardening
   ability of, 321, 437
   through-surface, 307
Hardness, 293, 354, 447
   deviations, 511
   hot, 374, 409
   Knoop, 471
Heating, induction, 307
Heat resistance, 279
Heat treatment
   process, 354
   response, 265, 437
Hertzian loading level, 70
Hertzian zone, 55
Hoop stress levels, 131
Hydrogen embrittlement, 167

I

Image analysis, automatic, 13
Impact resistance, 374
Inclusions, 3, 70, 109, 189, 202
   assessment, 124
   elastoplastic properties, 109
   nonmetallic, 13, 39, 87, 124, 249
   nonmetallic,
      characterization, 231
   nonmetallic, distribution,
      Hertzian zone, 55
   nonmetallic, effect on rolling
      contact fatigue, 249
   nonmetallic, quantification, 27
   nonmetallic, size prediction, 124
   ratings, 13, 27, 87, 202
   reducing, 189
Induction heating, 307
Inspection techniques, 307
Interference fit, 131
**INDEX**

**J**
JK chart ratings, 13

**L**
Laser glazing, 471
LM 12749, 471
Loading tests, 460
cyclic, 70
Lubricants and Lubrication, 447
boundary, 293, 447
clean condition tests, 249
clean oil, 279
contaminated, 279, 293
high temperature, 354
system development, 409

**M**
M50, 131, 354, 471, 499
M50 NiI, 131, 354, 374, 409
Magnetron sputtering system, unbalance, 499
Manganese sulfide inclusion, 70
Martensitic steel, 321, 391, 437, 447, 471
Metal softening, 152
Microscopic examination, 189
Microstructure changes, 152, 167, 216, 265, 437, 447
MIL-B-6039, 460
MIL-L-87100, 409

**N**
Nano-indentation tests, 109
Niobium, 499
Nitrided steel, 391
Nitride inclusion, 202
Nitriding, solution, 354
Nitrogen, 437
Nitrogen-alloyed steels, 131, 354, 391, 447
Nitrogen martensitic steel, 391
Nondestructive tests, 511

**O**
Oil inlet temperatures, 131
Oxide, 13
inclusion, 202
Oxygen analysis, 189
Oxygen content, 39, 12, 202
super clean, 87

**P**
Peeling, 293
resistance, 279
Plasticity, 70
behavior, cyclic, 109
PWA-524, 409
Pyrowear 675 stainless steel, 409, 460

**R**
Resonances, 511
Rig test, 409, 447
Rollers, 307
Rolling contact fatigue, 109, 152
behavior prediction, 39
carbon steel, 279, 293endurance limit estimation, 131
laser glazings, 471
life, 202, 216, 249, 391
life, austenite effects on, 265
cycle, 109
life prediction, quantitative, 55
material response, 152
nitrogen alloyed, 447
SAE 52100, 349
short crack behavior, 70
superlattice steel, 499
Rotating beam samples, 124

**S**
SAE 52100, 13, 216, 249, 307
Segregation, 265
Silicon, 279
Size distribution, 124
Skylube II, 409
Slag, top, control, 231
Soaking, 249
Sorbite structure, 307
Spalling, 55
fatigue fracture, 152
propagation, 447
Spectroscopy, resonance
ultrasound, 511
Sputtering system, unbalance magnetron, 499
Stability, bearing, high dimensional, 321
Stability, dimensional, 293, 335
Stability, thermal, 447
Statistics of extreme, 87, 202
Stereology, 13
Stress profiles, residual, 131, 152
Stress relaxation, 293
Stress, residual, 216, 265, 354, 460 compressive, 307
SUJ2, 279
Sulfides, 13
Sulfur content, 39
Superlattice coating, 499

T
Thermal stability, 447
Through surface hardening, 307 steel, 249, 279, 437
Titanium, 499 content, 231 nitride inclusion, 70
Troosite structure, 307, 321
Turbine engines, 131, 335

U
Ultrasonic testing, 27 echography, 109 immersed, 231 resonance, spectroscopy, 511 Unbalance magnetron sputtering system, 499

V
Vacuum melting, 335 Volumetric testing, 231

W
Water quenching, 307 Wear resistance, 447 Weibull distribution, 249, 447 White etching area, 109

X
XD15N, 391 X-ray diffraction, 152 X-ray spectrum analysis, 321
