Subject Index

A
Acid-base interactions, 174
Acid rain, 53, 167
Adhesion, 53, 67, 174, 271
water effects on, 209
Aging, 295 (See also Weathering tests)
heat, 193
outdoor, 122
Application failures, 315
Aspect ratio, 79
ASTM Committee C-24 on Building Seals and Sealants, 67
ASTM standards, 334
C 719: 122
C 880: 53
sealant movement, 95
sealant proposal, ASTM, 67
AVIS technique, 67

B
Backing material, 282
Barrier properties, 221
Bitumen, 237
Bond breakers, 108
Bond strength, 174, 209
Boyle's law of ideal gas, 22
Break strength, 193
Butyl/polyisobutylene tapes, 221

C
Cell (open/closed) structure, 282
CEN, 67
Closed cell, 282
Compression tests, 95, 282
C 719: 122
Condensation, 221
Construction tolerance, 141
Creep, 141
rupture, 7
Crosslinking, 167
Cure chemistry, effect on heat stability, 193
Curing, sealant, 271
Curtain wall, 42, 79, 141, 329, 334

D
Delamination, 303
Design issues, sealant
architectural, 334
curtain wall, 79
exterior insulation and finish systems, 303
fillet joint, 108
high rise, 329, 334
plate stresses, 22
roofing, 237
sealant failure, 315
sealant joint, 141, 295, 303, 315
sealant stresses, 22
Diisocyanates, 261
Durability (See also Movement capability), 122, 271, 295

E
Edge defects, 221
Elastic frame shortening, 141
Elastic modulus, 167
Elastomers, 167, 237, 261, 329
Elongation at break, 193
Expansion joint, 141
Exterior insulation and finish systems
sealants for, 303
European Committee for Standardization (CEN), 67

F
Failure, sealant, 315
Fatigue tests, 7
Fillet sealant joints, 108
Flexural strength, building stone C 880: 53
Four-sided structural glazing systems, 42
Fracture energy, 174
Freeze thaw test, 53

H
Hardness, 221
Heat compression test, 122
Heat stability, 193
High rise buildings, sealants for, 329, 334
Hydrogen, 261
Hydroxyl, 261

349
Immersion tests, 67, 167, 209
Insulating glass units
  seal shape changes, 42
  stresses, 22
  two-part silicone, tension, 7
International Organization for
  Standardization (ISO)
  TC59/SC8, 122

Joints, sealant
  design, 108, 141, 295
  failure, 303
  leakage, 295
  movement, 95, 271
  shape, 108
  surface bonds, water effects
    on, 209

Laminated glass bonds, 221
Leakage (See also Moisture effects)
  high rise, 334
  joint, 295
Load tests
  constant, 7
  ramp, 7
Loads, live and dead, 141

Mechanical cycling, 122
Methoxy silane, 271
Modelling, sealant stresses, 22
Modulus characteristics,
  sealant, 95
Moisture cure, 271
Moisture effects, 141, 334
  on joint surface bonds, 209
  on sealant properties, 167
Movement capability (See also
  Durability), 108, 122, 295, 329

Nongassing, 282
Nonlinear plate theory, 22

Open cell, 282
Outdoor aging of sealants, 122

Peel strength, 174
Physical property changes,
  silicone rubber sealants, 167
Plate stresses and deformations, 22
Polymers, 261
Polyolefin blends, 282
Polyoxypolypropylene, 271
Polysulfide sealants, 329
Polyvinyl butyral, 221

Qualification procedures,
  sealant, 334
  Europe, 67
  polyurethane, 261
  United States, 67
QUV laboratory accelerated
  weathering tester, 53, 221

Regression analyses, 7
Roofing, 237

Sealants
  back-up material, 282
  compatibility with laminated
    glass, 221
  construction adhesive, 329
  curing rates, 271
  durability, 122, 271, 295
  elastic, failure mechanism, 295
  failure, 315
  joint design, 108, 141, 295
  joint failure, 303
  joint stresses, 108
  neutral core, 7
  performance factors, joint, 141
  performance rating, 209
  polysulfide, 329
  polyurethane, 261
  qualification procedures, 67
  roofing, 237
  selecting, 261, 315
  service evaluation, 295
  silicone, 42, 329
    acetoxy, 7
    adhesion, 174
    design criteria, 79
    elastic behavior modelling, 22
    heat aging effects on, 193
high modulus, 221
high-rise buildings, for, 329
low modulus, 221
modified polyether, 271
moisture cured, 271
moisture effects on, 167
one-part silicone, 193
requirements for stone
    panels, 53
    seal shape changes, 42
temperature effects on, 167
two-part, tension test, 7
solvent acrylic, 329
stress analysis, 22, 79, 95, 167
technology, 334
urethane, 329
waterproofing, 237
water resistance, 209
Shape changes, sealant, 42
Shear strength, 174
Shear tests, 95
Silicon modified polyether, 271
Silicone sealants (See Sealants)
Single-ply roofing systems, 237
Standards (See also ASTM
    standards)
    international, 122
    sealant, 67, 334
Stiffeners, 53
Stone panels, 53
Stopless glazing, 329
Stress analysis, 79, 95, 167
    modelling, 22
Structural bedding, 53
Structural glazing
    creep rupture and fatigue
    resistance, 7
curtain wall design issues, 79
high rise buildings, 329, 334
modelling stresses, 22
requirements for attaching
    stone, 53
    sealant qualification
    procedures, 67
    seal shape changes, 42
    systems, 334
Structural perimeter seal, 53
Substrate failures, 315
Synthetic stucco, 303

T

Tensile adhesion tests, 53
Tensile strength, 174, 193
Tension tests, 95, 167, 295
Thermal effects on sealant
    properties, 167
Thermal movements
    sealant joint design, 141
Thermoplastics, 237, 261
Tooling, 315
Triangular joints, 108

U

UEATC, 67
Urethane sealants, 329

V

Viscoelasticity, 167
Von Karman nonlinear plate
    theory, 22

W

Water resistance, sealant, 209, 334
Waterproofing, 237
Weathering tests, 53, 122, 221,
    237, 271
Weatherometer, 53, 221
Wind pressure (See also Load
    tests), 22, 42
