Subject Index

A

Anisotropic properties, 337, 583, 740
Annealing
  dislocation loops, 318
  embrittlement, 172
  high temperature, 556
  hardening, 151
  isochronal, 406
  kinetics, 151, 875
  mechanical properties, 1103, 1122
  positron techniques, 172, 472, 486, 495
  recovery mechanisms, 151
  solute segregation, 603, 645
  thermal treatments, 50, 64, 337
  vacancy defects, 172, 472
ASTM standards
  A 203—Specification for Pressure Vessel Plates, Alloy Steel, Nickel, 311
  A 706—Specification for Low-Alloy Steel Deformed Bars for Concrete Reinforcement, 1304
  A 508—Specification for Quenched and Tempered Vacuum-Treated Carbon and Alloy Steel Forgings for Pressure Vessels, 23
  A 533—Specification for Pressure Vessel Plates, Alloy Steel, Quenched and Tempered, Manganese-Molybdenum and Managanese-Molybdenum-Nickel, 238
E 208—Method for Conducting Drop-Weight Test to Determine Nil-Ductility Transition Temperature of Ferritic Steels, 251
E 693—Practice for Characterizing Neutron Exposures in Ferritic Steels in Terms of Displacements per Atom, 420
Atomic clustering processes, 437
Atomic displacements, 3, 172
Auger electron spectroscopy, 633, 645, 1061
Auger sputter profiling, 621
Austenitic stainless steels
  boron microalloying, 1122
  cavity formation, 1051
  cold-worked, 1083
  creep rate, 995, 1034, 1083
  dislocation loops, 1015, 1034
  dislocation structure, 1015, 1051, 1061
  displacement damage, 1051
  ductility, 995, 1051, 1071
  fatigue crack growth, 1083, 1095, 1103
  fluence levels, 1071
  fracture toughness, 1071, 1103
  hardness testing, 1061
  mechanical properties, 1071, 1083, 1095, 1103
  microchemical changes, 969, 1015, 1051
  microstructural analysis, 995, 1015, 1034
  nickel content effects, 1015
  phase diagrams, 945
  phosphorus effects, 995
  rare earth microalloying, 1122
  sink strength, 1015
  solute segregation, 1015
  surface modifications, 1061
  tensile strength, 1034, 1071, 1103
  void swelling, 995, 1015, 1122
Auto-oscillation processes, 594

B

Basal pole figures, 337
Body-centered cubic metals, 928
Bonding curves, 270
Boron microalloying, 1122
Boron nuclei, 3
Brittle-ductile transitions, 23, 50, 151
Brittle fracture, 203, 507 (see also Fracture)
Burger's vector, 375, 385, 530, 1034

C

Calandria tube assemblies, 311, 1304
Cascade
  ceramic defects, 733
  collapse, 385
Cascade—continued

collisions, 406, 583
damage, 385
displacements, 375, 385, 406, 463
internuclear, 3

Ceramics damage
alumina, 740, 749, 764
aluminum matrix composites, 776, 785
amorphization threshold, 740
anisotropic parameters, 740
cascade defects, 733
cavity formations, 749
compressive stress, 740
crystal defects, 733, 740, 776
defect hardening, 740
density measurements, 733
diffraction analysis, 733
electrical conductivity, 776
fusion window materials, 764
interstitial dislocation loops, 749
mechanical properties, 740, 749, 764
microstructural analysis, 785
near-surface properties, 740
point-defects, 764
polycrystalline spinels, 749, 764
recrystallization, 733
resistivity, 733
superconductors, 733
tensile strength, 785
tension tests, 785
thermal conductivity, 764

Charpy impact testing
fuel subassemblies, 1209
fusion reactor components, 1256
pressure vessel beltlines, 56, 216
pressure vessel plate materials, 203, 238, 1304
pressure vessel trepanned materials, 93
reconstituted specimens, 76
submerged-arc weld metals, 186, 251, 270, 292

Cold working techniques, 945, 995, 1083
Computer modelling, 131, 375, 1167
Contractile strain ratios, 337
Control rod guide tubes, 448
Convergent beam diffraction, 186

Copper/copper alloys
aluminum, 448, 854
annealing, 151
chromium, 854
defect clusters, 813
dislocation motion, 813
displacement damage, 854
ductility, 835, 846
electrical conductivity, 813

fracture morphology, 835, 846
grain boundary analysis, 813
hafnium, 854
hardening, 151, 813
heat flux components, 835
helium bubble growth, 875
interstitial migration, 875
iron, 131
laser welding effects, 854
microstructure evolution, 854
nickel, 151, 846
precipitation, 131, 813, 846
positron studies, 875
palladium, 406
recrystallization, 846
solute segregation, 813
tensile properties, 818, 835, 846
thermal conductivity, 813, 846, 854
void swelling, 813, 835, 846

Corrosion resistance, 689, 945
Crack propagation, 835, 1083
Cryogenic temperatures, 406
Crystallographic
conductivity, 776
impurities, 594
orientation, 337, 740
response, 437
structures, 406, 733
textures, 337
void swelling, 594

Cyclotrons, 875, 915

D

Defect
absorption, 709
densities, 569, 594, 733
hardening, 740
production, 420, 463, 472
solute clusters, 151, 813
Depleted tungsten, 3
Depleted uranium, 3
Design code databases, 12
Differential thermal analysis, 945
Diffraction analysis, 689, 733
Diffusivity parameters, 472, 486, 495
Disk bend test, 1051

Dislocation
bias factors, 928
boundary, 1135
density, 885
dissociated, 448
loops, 1015, 1034, 1167, 1180
mobility, 117, 517
pinning, 1061
slip bands, 813
structure, 1015, 1051, 1157
Displacement damage, 420, 854
Doppler measurements, 172, 495
Drop-weight testing, 251, 270
Ductile fracture behavior, 203, 835, 846
Dynamic fracture toughness, 311

E

Electric Power Research Institute, 238, 251
Electrical conductivity, 355, 776, 813
Electrical resistivity, 472, 733, 945
Electron beam welding, 76, 1103
Electron irradiation
dislocation loops, 448, 1034
order-disorder transformation, 406
void swelling, 569
vacancy clustering, 448
Electron microscopy
analytical, 603, 621, 897
atomic probe field-ion, 131
diffraction, 486, 958, 1157
high resolution, 117
high-voltage, 448, 785, 1034
in-situ transmission, 375
field emission gun, 633, 645
scanning, 186, 785, 1061
transmission, 93, 117, 131 (see also Transmission electron microscopy)

Embrittlement,
dislocations, 448, 1157
helium, 486, 507, 897, 915
high temperature, 216, 495, 1287
hydrogen, 645
low temperature, 1180
mechanisms, 23, 50, 203
pressure vessels, 131, 151, 172 (see also Pressure vessel fracture toughness)
temperature induced, 216
vacancy clustering, 448
Ensemble macrodefects, 556
Exponential curve-fitting models, 270

F

Face-centered cubic alloys, 928
Fast breeder reactor studies
cooling channel ducts, 1190, 1267
core components, 569, 633, 1157, 1167
fuel claddings, 995, 1209, 1267
fuel pin claddings, 1122, 1180
pressure vessel materials, 1287
wrapper tube materials, 1083, 1209
Fast flux test facility studies
austenitic steels, 1071
ceramic composites, 785
copper alloys, 835, 846
martensitic steels, 1256, 1267
performance prediction model, 12
vanadium alloys, 885, 928
Fatigue
axial specimens, 1095
crack growth, 1083, 1103
resistance, 1103
Faulted vacancy loops, 385
Fracture
brittle, 203, 507, 1267
channel, 1234, 1267, 1304
crack arrest, 251
ductile, 203, 238, 835, 846
elastic-plastic, 270, 1287
mechanics, 203, 216, 270, 1103
morphology, 835, 846
property recovery, 318
resistance curves, 203, 216
toughness studies, 50, 56, 151, 1071
Frank loops, 1034, 1051
Fuel claddings
austenitic steels, 995, 1071, 1122
chromium alloys, 448, 603
martensitic steels, 1180, 1209, 1267
titanium alloys, 495
zircaloys, 689
Fuel assemblies, 64, 1122
Fuel stringers, 64, 645, 667
Fuels
oxide, 1071
plutonium, 1071
uranium, 3, 797, 1122
Fusion Materials Program, 1234
Fusion reactor applications
alumina crystals, 749, 764, 776
aluminum matrix composites, 785
ceramic composites, 785
titanium alloy, 495
zircaloys, 689
blanket structures, 1256
copper alloys, 813, 835, 854
first wall components, 1051, 1095, 1103
martensitic stainless steels, 979, 1157, 1167, 1243
plasma-facing components, 846
plate materials, 1287
polycrystalline spinels, 749
structural wall components, 897
superconductors, 733
vanadium alloys, 897
window materials, 764
**G**

Garter springs, 311
Grain boundary microchemistry, 621

**H**

Heat treatments, 56, 318, 472, 703
Heavy Section Steel Irradiation Program, 238, 251
Heavy water modulation, 3, 311
Helium desorption, 486
Helium migration, 875, 979
Hexagonal close packed metals, 385
High energy transport code, 3
High flux isotope irradiation, 1135, 1256
High temperature irradiation capsules, 12
Hydride cracking, 318
Hyperbolic tangent model, 270

**I**

Impression testing, 337
Impurity diffusion, 375, 507
Indexed temperature values, 203
Intergranular corrosion, 603
Intermetallic precipitates, 355
International Atomic Energy Agency, 203
Interstitial
  - cluster nucleation, 437
  - concentrations, 437, 517
  - dislocations, 448, 517, 749
  - drag mechanisms, 621
  - migrations, 875
  - reordering, 406
  - sink strengths, 569
  - solute segregation, 689
Inverse-Kirkendall mechanism, 621, 709
Ion implantation, 1061
Ion irradiation
  - argon bubble formation, 486
  - austenitic steels, 958, 1015, 1051
  - ceramics damage, 733, 749
  - copper, 375
  - creep parameters, 530, 540
  - displacement cascades, 385, 463
  - martensitic steels, 979, 1167
  - microstructural analysis, 958
  - nickel, 375
  - order-disorder transformation, 406
  - pressure vessel steels, 238
  - recrystallization, 733
  - solute segregation, 621, 703
  - trend curves, 238
  - void swelling, 556, 1015
Ionic conductivity, 355

**Irradiation creep**
  - crack growth rates, 1034, 1083
  - dislocations, 517, 530, 540
  - fatigue interaction, 1083, 1103
  - general, 448, 1209
  - interstitial concentrations, 517
  - loop growth kinetics, 530
  - phosphorus effects, 995
  - plastic formation, 530
  - point-defect concentrations, 517, 530, 540
  - theoretical models, 517, 540
  - thermal aging, 1135, 1190
Isothermal positron studies, 875

**K**

Kirkendall effect, 603
Knoop hardness testing, 1061

**L**

Laser welding effects, 854
Lattice parameters, 151, 172, 583
Light water modulation, 3
Lindhard function, 420
Load extension testing, 311
Longitudinal tension specimens, 311
Low activation steels
  - electron diffraction analysis, 958
  - austenitic alloys, 945, 958, 969
  - cold worked, 945
  - corrosion resistance, 945
  - diffusion, 969
  - ductility, 945
  - electrical resistivity, 945
  - enrichment, 969
  - helium bubble density, 979
  - loop distribution, 979
  - magnetic response, 945
  - martensitic alloys, 979
  - microstructure, 958, 969
  - phase diagrams, 945, 958, 969
  - radioactivity levels, 958, 979
  - recycling, 969
  - solute segregation, 969
  - thermal analysis, 945
  - thermomechanical treatments, 945
  - void swelling, 958, 969
Lower bond curves, 251
Magnetic resistivity, 472, 945
Martensitic stainless steels
  austenitic steel comparisons, 1167, 1209, 1243
  brittle-ductile transitions, 1256, 1267
  brittle fracture, 1267
  Charpy impact testing, 1209, 1256, 1304
  computer models, 1167
  channel fracture, 1234, 1267, 1304
  deformation, 1234
  dislocation loops, 1157, 1180, 1234
  dislocation structures, 1135, 1167
  ductility, 1180, 1234, 1243
  elastic-plastic fracture, 1287
  embrittlement, 1157, 1180, 1209, 1287
  impact hardening, 1243, 1256
  irradiation creep, 1209
  Laves phase, 1135, 1157, 1190
  linear elastic behavior, 1267
  mechanical properties, 1209, 1234, 1243
  microalloyed, 1304
  microstructural analysis, 1135, 1157, 1167, 1180
  phase stability, 1209
  precipitate evolution, 1190
  precipitate structures, 1135, 1157, 1180
  solute concentrations, 1157
  stress parameters, 1190, 1243
  sulfide morphology, 1304
  tensile properties, 1135, 1180, 1209, 1267
  thermal aging, 1135, 1190, 1287
  thermal conductivity, 1190
  upper shelf energy, 1256, 1287
  void swelling, 1157, 1167, 1234
Material feasibility studies, 12
Materials open test assembly, 12
Metals and metal alloys
  aluminum, 463
  aluminum-carbon, 785
  aluminum-manganese, 486
  aluminum-nickel, 709, 785
  aluminum-silicon, 785
  aluminum-zinc, 709
  austenitic steels, 495, 928 (see also Austenitic stainless steels)
  beryllium, 3
  chromium, 621
  chromium-implanted alumina, 740
  chromium-nickel-niobium, 603
  copper, 375, 569, 835 (see also Copper/copper alloys)
  copper-aluminum, 448, 854
  copper-chromium, 854
  copper-hafnium, 854
  copper-nickel, 151, 846
  copper-palladium, 406
  iron, 420
  iron-copper, 131
  iron-copper-nickel, 131
  iron-implanted aluminum, 703
  iron-manganese-chromium, 945, 958, 969
  iron-nickel-chromium, 448, 472, 645 (see also Austenitic stainless steels)
  manganese-nickel-molybdenum, 117, 186, 216, 292
  martensitic steels, 633, 979 (see also Martensitic stainless steels)
  nickel, 56, 375, 569, 1034
  nickel-silicon, 709
  plutonium, 1071
  titanium, 495, 385
  tungsten, 3
  uranium, 3, 797
  vanadium, 885 (see also Vanadium alloys)
  vanadium-chromium-titanium, 885, 897
  vanadium-iron, 928
  vanadium-silicon-titanium, 885, 897, 915
  vanadium-titanium, 885, 915
  vanadium-titanium-niobium, 995
  yttrium, 1122
  zirconium, 337 (see also Zirconium alloys)
Metals recycling, 969
Modified phase diagrams, 709
Molecular antimony ions, 385
Mossbauer effect, 703

N
Neutron embrittlement, 50, 151, 216 (see also Embrittlement)
Neutron fluxes 3, 50, 64, 216
Neutron irradiation
  anisotropic properties, 337
  austenitic steels, 969, 995, 1071, 1122
  ceramics, 733, 764, 785
  copper/copper alloys, 835, 846, 854
  defect production, 420
  fatigue crack growth, 1083, 1304
  fracture behavior, 846, 1071, 1267
  helium embrittlement, 897, 1287
  martensitic steels, 1135, 1180, 1209, 1234
  order-disorder transformation, 406
Neutron irradiation—continued
recrystallization, 733
solute segregation, 621, 633, 667
tensile behavior, 835, 846, 885
vacancy migration, 406
vanadium alloys, 885, 897
void swelling, 556, 835, 969
Neutron scattering, 93, 117, 131
Neutron spectrum, 3, 93
Nil-ductility testing, 238, 251, 311
Nimonic tie bars, 645
Nodular corrosion, 355
Nonlinear regression analyses, 270
Nuclear accelerators, 749, 1167
Nuclear reactor types
advanced gas-cooled, 645, 667
boiling water, 355
CANDU, 318, 337
fast breeder, 569, 633 (see also Fast breeder reactor studies)
fusion (experimental), 12, 486, 517 (see also Fusion reactor applications)
gas-cooled, 12, 64, 603
graphite moderator, 64
heavy water, 93
light water, 76, 251, 270
liquid metal breeder, 1190, 1267
pressurized heavy water, 311
pressurized water, 23, 50, 117, 216
space power, 12, 1071
Tokamak (fusion), 1095
water-cooled, 776
Nuclear reactors (commercial)
Ardennes Nuclear Power Plant (France), 23, 117
BOR-60 reactor (Russian Republic), 1122
Imatra Power Company (Finland), 203
Nuclear Electric (England), 64
Phenix reactor (France), 995
Rajasthan Atomic Power Station (India), 311
Tarapur Atomic Power Station (India), 56
