Subject Index

316L stainless steel, 50, 194, 211
macrophage cells and corrosion, 137

A
AISI 630, 13
Alloy, 176
Anodic polarization, 107
Arthroplasty, 222
ASTM A 262E, 176
ASTM F 138, 168
ASTM F 746, 176
ASTM F 1314, 3
ASTM F 1586, 3, 39, 168
ASTM F 1801, 194
ASTM F 1875, 235
ASTM F 2129, 176
ASTM F 2180, 50
ASTM G 5, 107
ASTM G 71, 107
Austenitic stainless steel, 119, 168, 194
intergranular, 176
macrophage cells and, 137
pitting, 3, 176
properties, 39, 72
resistance, 13, 119, 176
wear-induced, 211
Crevice corrosion, 176, 222, 262
Cutting, 13
Cyclic fatigue, 119
Cytokines, 262
Cytotoxicity, 119
Dilation-balloon expandable coronary stents, 176
Electrochemical studies, 168
Electron microscopy, 222
Elongation, 39
Fatigue, 119, 194
resistance, 93
testing, 154, 194
Femoral head, 235
Femoral stem, 39, 249
Foreign-body reaction, 222
Forged hip stems, 39
Fretting corrosion, 222, 235, 262
Galvanic corrosion, 107
Hardness, 13, 39
High cycle fatigue tests, 93
High-nitrogen stainless steel, 39, 72, 119, 211, 235
Hip prosthesis, 222
Hip stems, 39, 235
Implant materials, 3, 194, 211
Implant surface, 249

Bending properties, 93
Biocompatibility, 119, 137
BioDur 108, 107, 154, 194
BioDur 316LS, 176
Biomechanics, 222
Bone plate, fatigue, 93
Bone resorption, 222
Bone screw, 93
Breakdown potentials, 168, 176

Cable systems, 50
Cell culture, 137
Cement fixation, 249
Chromium, 262
CoCr alloy, 211, 235
Compatibility, MRI, 82
Coronary stent, 28, 61, 176
Corrosion, 107, 176
creviced, 176, 222, 262
fatigue, 154, 194
fretting, 222, 235, 262
galvanic, 107

Inclusions, 72
Intergranular corrosion, 176
Intergranular crack initiation, 93
ISO 5832–9, 39

L
Low-nickel stainless steel, 93, 107
notch sensitivity and stress corrosion, 154

M
Macrophage cells, stainless steel corrosion and, 137
Macrophages, 222
Magnetic resonance imaging, 82
Martensitic steel, 13
Mechanical properties, 3, 39, 72
Medical instruments, 13
Metal ions, 262
Metals, 222
Microstructure, 3, 39, 50, 72
Modularity, 262

N
New PHACOMP, 28
Nickel-free stainless steel, 119
Nitrogen alloyed steel, 13
Nonmetallic inclusions, 3, 50
Notch sensitivity, 154

O
Orthopedic implants, 168
Osteolysis, 262

P
P2000, 119
Particle size, 222
Particulate debris, 222, 262
Pitting corrosion, 3, 176
Platinum, 176
Platinum-enhanced radiopaque stainless steel, 28, 61, 176
Polymethylmethacrylate, 222
Potentiodynamic polarization, 176

R
Radiopacity, 28, 176
Repassivation, 211
Ringers solution, 176

S
Safety, MRI, 82
Sandvik Bioline High-N, 3
Sendzimir mill, 61
Serum proteins, 262
Sliding wear, 211
Stem-cement interface, wear, 222
Stress corrosion cracking, 154
Surface analysis, 137
Surgical implants, 50
Systemic dissemination, 262

T
Tapered stem, 249
Taper interface, 235
Tensile strength, 39
Titanium alloy, 211, 235
Total hip replacement, 222, 249

U
UNS S31683 alloys, 28, 61, 176

V
Vacuum arc remelting, 61
Vacuum induction melting, 61
Vickers hardness, 39

W
Wear, mechanism, 222
Wear-induced corrosion, 211
Wear resistance, 13
Wire, 50

X
XM 16, 13
X-rays, 176

Y
Yield strength, 39
