Subject Index

A

Adhesive bonding, 222, 268
Aircraft, aging, 546, 557
Alumina, 19
Aluminum, 222
    alloys, 358, 467, 546
    copper alloy, 502
    lithium alloy, 502
Antiplane shear effect, 191
Asperity, 484
ASTM standards
    A 710, 533
    E-813, 415
Asymptotic analysis, 156
Asymptotic stresses, 309

B

Bending, effects on partially bonded strips, 206
Bending moment crack growth method, 255
Body force method, 591
Bonded orthotropic infinite strips, 156
Boundary simulation, moving, 622
Box beam, cellular, 518
Brittle fracture, 71

C

Calibration factor, 380
CCT specimens, 380
Cellular automata, 328
Cellular box beam, 518
Ceramic coatings, 177
Ceramics, 46
    piezoelectric, 61
    structural, 19
    zirconia-containing, 3, 31
Charpy specimen testing, 294, 343
Chemicals, time release for crack repair, 268
Cladding, 637
Cleavage, 448
Collinear cracks, 156
Compact tension, 31, 358
Composites
    cementitious, 268
    patch repair, 546
    polymer, 140
    polymer matrix, 125
    sapphire fiber, 241
Concrete, 46, 268, 283
Conduction coupled
    thermoelectric cell, 646
Copper and aluminum alloy, 502
Corrosion resistance, 546
Crack analysis, 591
Crack closing stress, 283
Crack closure, 484
Crack, collinear, 156
Crack distribution, 557
Crack effects, 61
Crack, equilibrium, 622
Crack growth
    bending moment method, 255
    crack tip to tip bridging method, 255
    fatigue, 467, 484
    stable, 106
    subcritical, 71
    thermal stressing method, 255
    zirconia-containing ceramics, 3
Crack, indentation, 255
Cracking, interfacial, 89, 140, 177
Crack initiation, 380
Crack, mixed mode, 467
Crack model, cohesive, 46, 433
Crack mouth opening displacement, 397
Crack opening displacement, 283
Crack path deflection, 502
Crack, planar, 622
Crack, repair, 268
Crack resistance, 31
Crack, semi-elliptical, 397
Crack, shallow edge, 309
Crack shearing stress, 283
Crack sliding displacement, 283
Cracks, long, 518
Cracks, multiple-ended, 518
Cracks, subsurface, 606
Cracks, surface, 606
Crack tip, 191
constraint, 685
deformations, 177
fields, 685
growth method, 255
opening angle, 358
Crack tunneling, 358
Crack-wake bridging, 31
Creep, 309
Crystallographic cracking, 502
Crystals, large grain, 467
Cylinder correction factor, 575

Damage growth, 671
Damage tolerant evaluation, 557
Debonding
bimaterial problem of strip, 206
interfacial, 125
Decohesion, 89
Defect, 591
Deformation, 343
quasi-three-dimensional, 191
Degradation, 671
Delta process, rip-driving-force variation, 575
Diffusion problems, nonlinear, 622
Dimensional similarity, 660
Direction dependence, interfacial cracking, 89
Discontinuities, 533
Dislocation emission, 89
Displacement behavior, 433
Double cantilever beam specimens, 31
Double hull, 518
Ductile brittle transition, 89
Ductile damage, 328
Ductile failure, 397
Ductile fracture, 106
Ductile tearing, 415
Dundurs' constants, 206

Edge-cracked geometries, 309
Edge-cracked T-section, 660
Elasticity, 591
Electromechanical response, piezoceramics, 61
Ellipsoidal cavity, 591
Elliptical cavity, problems of, 61
Elliptical hole, 591
Energy separation method, 380
EPDM, 380

FALSTAFF, 502
Fastener joint, 557
Fatigue cracks, 518
Fatigue resistance, 546
Fatigue thresholds, 484
Fiber fragmentation tests, 140
Fiber-matrix interface, 125, 140
Fiber pullout, 125
Finite element code, 358
Finite element analyses, 125, 309, 637
boundary layer formulation, 685
crack prediction, 646
dynamic, 283
models, 328, 397, 622, 660, 671
three dimensional, 222
two dimensional, 222, 358
Finite size effects, 380
Flaw tolerance, reactor pressure vessels, 415
Flexural toughening, 268
Fluorescence, 241
Frictional contact, 606

Gas cylinder, 575
Glass transition, interphase, 140
Grinding, 19
Groove welds, 533

Heat-treated low-alloy steels, 575
Heavy Steel Section Technology Program, 415
INDEX 709

Hoop stress, 575
HSLA steel, 518
HSLA-80, 533
Hydrotest, 575

I

I-beams, 533
Ice, 433
Impact testing, 294
instrumented, 343
Indentation microcracks, 255
Initiation toughness, 294
Integro-differential equations, 606
Interaction, 591
Interface, 156
Interfacial cracking, 89, 177, 191, 206
Interfacial debonding, 125
Interfacial fracture, 191
Interfacial microcracking, 140
Interfacial shear strength, 140
Interfacial toughness, 89

J

J-integral, 309, 380, 397
nozzle steel characterization, 415
Joints
fastener, 557
T-peel, 222
Josephson junctions, 255
J-Q theory, 685
J-R curve, 448
J-resistance curve, 415

K

K\textsubscript{R} curve, 31

L

Lanthanum aluminate, 255
Lapping, 19
Lithium and aluminum alloy, 502
Load, applied, 106, 358
Load displacement curves, 46, 484
Loading, dynamic, models, 343
Loading phase angle
dependence, 89
Loading, shear, 191
Loading, structural degradation
under, 671
Loading, tensile, 191
Load motion, contact, 606
Load, nonlinear, 433
Load ratio, 484
Load separation, 397
Load transfer, 140
Load transmission, 557

M

Magnesia, 255
Mapping, 671
Martensitic phase, 3
Mesoscale, 328
Microindentation techniques, 255
Microstructure, 328
Mismatch stress, 646
Mixed mode conditions, 106
Mixed mode crack, 467
Mixed mode loading, 283
Models and modeling
cohesive crack, 46, 433
dislocation, 484
ductile damage, 328
fatigue crack growth, 533
finite element, 397, 622, 660, 671
focal point, 46
Gurson, 343
hierarchical, 328
hydraulic fracturing processes, 622
loading, dynamic, 343
micromechanical, 343
single fiber cylindrical composite, 125
stochastic variability of toughness, 448
Modulus of elasticity, 177
Moire interferometry, 283
Monte Carlo method, 71

N

Nonlinear load behavior, 433
Nozzle corner flaw tests, 415
Numerical analysis, 3, 591
Orthotropic layers, 156

Photoelasticity, dynamic, 294
Piezoelectric ceramics, 61
Piezo-spectroscopy, 241
Plasticity, 309, 484, 502
Plate thickness, effect on stress intensity factors, 191
Polymer, 380
Pores with liquid, 606
Powder metallurgy, 546
Pressurized cylindrical shells, 671

Random hole array experiments, 328
Rebond fibers, 268
R curve, 433
Residual stresses, 19, 241, 518
Resistance curve, 31
Rip resistance, 575
Roughness induced closure, 502
Roughness, surface, 502
Rubber, 380
Ruby, 241

Sapphire-fiber composites, 241
Scatter, 71
Sea ice, 433
SEN'B specimens, 343
SENT specimens, 309, 380
Shear decohesion mechanism, 467
Shear strains, 3
Shear stress, resolved, 467
Ship design, 518, 533
Short rod beam specimens, 46
Silicon nitride, 19, 71
Single edge notched beam specimens, 31
Single separation technique, 397
Singular integral equations, 156, 591
Slip system, 467
Small scale yielding, 106, 685
Splitting cavities, 606
Stability, 3
Stable ductile tearing, 415
Statistical Fracture Mechanics approach, 71
Stress, crack closing, 283
Stress, crack shearing, 283
Stress, field, hydrostatic, 685
Stress intensity factors, 156, 191, 206, 518, 591
calculation, 637
solutions, 660
Stress, pre-, warm, 685
Superconductors, 255
Superplastic forming, 546
Surface flaws, 397

Tearing, 448
Tensile force, 206
Tensile stress distribution, 222
Tensile test, dynamic, 343
Thermal expansion, 646
Thermal expansion coefficient, 177
Thermal shock, 637
Thermal stressing method, 255
Thermal stress, residual, 646
Thermoelectric cell, 646
Thermomechanics, 125
Thermoplastic coating, 125
Thin web sections, 660
Three dimensional analysis, 191, 343  
Titanium aluminum matrix, 241  
Toughening, transformation, 3  
Toughness, lower bound, 294  
T-peel joint, 222  
Transformation toughening, 3  
Transition region, cleavage fracture, 448  
Transmission fluorescence spectroscopy, 241  
Tunneling, 358  
Two dimensional analysis, 222, 358  

W  
Water tests, 575  
Weakest link approach, 448  
Weibull distribution, 557  
Weibull statistics, 448  
Weld, 533  
Weld bonding, 222  

X  
X-ray diffraction, 19  

Y  
Yielding, small scale, 106  

Z  
Zirconia, 3, 31
