Subject Index

A
Abrasion resistance, 23, 174
Ammonia intrusion test, 65
ASTM Committee F-23: 7, 245
ASTM standards
F 739-85: 146
review of, 11

B
Benzene, 265
Breaking strength, 185
Breakthrough time, 113, 132, 265
Butyl rubber, 146, 195

C
Calorimetry, differential scanning, 185
Carbon laminates, 41
Carcinogenic materials, 265
Carrier solvents, 113, 146
Carts for spill control, 167
Chemical permeation (See Permeation)
Chemical resistance testing (See Test methods, field; Test methods, laboratory)
Chemical warfare agent testing, 174, 195
Chlorinated polyethylene materials, 102
Clothing, protective
breaking strength, 185
breakthrough time, 113, 132
butyl, 146, 195
chlorinated polyethylene materials, 102
classifications, 7
comfort factors, 7, 41, 51
design evaluation and selection, 11, 65, 174, 215
diving suits, 174, 195, 215, 225
fabrication methods, 225
fire fighters', 51, 86
flammability, 86
fully encapsulated, 51, 65, 174, 195, 215, 225
gloves, 146, 157, 195
HAZMAT, 51
heat degradation, 86, 132
heat stress in, 41, 51
human factors, 7, 41, 51
leak integrity, 65, 225
limited use, 65
literature review, 11
materials, comparison of, 11, 146
neoprene, 146, 157
nitrile, 146, 157
Nomex fabric, 86
performance specifications, 7 (See also Standards for protective clothing)
permeation properties (See Permeation)
physical properties (See Physical properties of protective clothing materials)
polyethylene, 146
polyvinyl chloride, 146
propellant handling, 102, 185
respiratory protective devices, 167
rubber, natural, 146
seaming techniques, 225
in semiconductor industry, 167
standards (See Standards for protective clothing; Test methods, field; Test methods, laboratory)
TECP suit testing and comparison, 65
test methods (See Test methods, field; Test methods, laboratory)
thermal hazards, 86, 132
Tyvek, 157
Viton, 157, 195
Comfort factors of protective clothing, 7, 41, 51
Construction of protective clothing, 225
Contaminated water diving, 174, 195, 215
Criticality analysis, 215
Cut resistance, 23

D
Decontamination methods, 102
Differential scanning calorimetry, 185
Diffusion coefficient, effect of temperature, 132
Diffusion of solvents, 113
Diving suits, 174, 195, 215, 225

F
Fabrication methods, 225
Fabrics, physical properties of (See Physical properties of protective clothing materials)
Failure modes, 215
Fick's Laws for diffusion, 113
Fire fighters' clothing, 51, 86
Flammability of protective clothing, 86
Fully encapsulated clothing, 51, 65, 174, 215

G
Garments, protective (See Clothing, protective)
Glove materials, permeation through, 146, 157, 195

H
Hansen's solubility parameter, 113
HAZMAT clothing, 51
Heat degradation of protective clothing, 86, 132
Heat stress and strain, 41, 51

Hildebrand's solubility parameter, 113
Human factors in protective clothing, 7, 41, 51
Hypergolic materials, 102

L
Leak integrity of protective clothing, 65, 225
Level A clothing, 51, 65, 174, 215
Limited-use garments, 65

M
Masks, protective, 167
MIL-STD-1629A, 215
Mixture permeation, 113
Molecular kinetics, 113
Monomethyl hydrazine, 102, 185
Mutagenic materials, 265

N
National Fire Protective Association standards, 245
Navy diving, 174, 195, 215, 225
Neoprene rubber, 146
Neutralizing solutions, 167
Nitrile rubber, 146
Nitrogen tetroxide, 102, 185
Nomex fabric, 86

O
Occupational hazards, 7
OSHA 29 CFR, 65

P
Performance standards (See Standards for protective clothing)
Permeation through butyl rubber, 146, 195
carrier solvents, 113
clothing selection by permeation data, 11
Permeation (continued)
of contaminated water
through diving suits, 174, 195, 215, 225
minimum detectable
permeation rate, 265
of pesticides through
gloves, 146, 157
of solvents, 113, 146
temperature influence,
132
through Viton, 146, 195
Pesticides, 146, 157
Physical properties of
protective clothing
materials
abrasion resistance, 23, 174
breaking strength, 185
breakthrough testing, 113
cut resistance, 23
failure modes, 215
flammability, 86
heat degradation, 86, 132
leak integrity, 65, 225
permeation data, 11, 146
pressure testing, 65
puncture resistance, 23
standards, 245
tearing, 23
Physiological stress, 7, 41, 51
Polyethylene, 146
Polytetrafluoroethylene
laminates, 41
Polyvinyl chloride, 146
Pressure testing of fully
encapsulated
clothing, 65, 174
Propellant handling
clothing, 102, 185
Protective clothing (See
Clothing, protective)
Puncture resistance, 23

R
Respiratory protective
devices, 167
Rubber, solvent permeation
through, 146, 157

S
Sampling and analysis (See
Test methods, field)
Seaming techniques, 225
Selection and use of
protective clothing, 11, 65, 174, 215
Semiconductor industry,
hazardous chemicals
in, 167
Solubility of materials, 113, 132
Solvents, permeation
through protective
clothing, 113, 146
Spill control, 167
Spirometry, 167
Standards for protective
clothing (See also
Test methods, field;
Test methods,
laboratory)
ASTM Committee F-23
activities, 7, 245
ASTM standards
F 739-85: 146
review of, 11
MIL-STD-1629A, 215
minimum detectable
permeation rate, 265
National Fire Protective
Association, 245
OSHA 29 CFR, 65
Supplies for spill control, 167
T
Tearing of protective
clothing materials, 23
TECP suits, 51, 65, 174, 215
Tensile strength of
protective clothing
materials, 23
Teratogenic materials, 265
Test methods, field
ASTM F 739-85: 146
fully encapsulated
clothing, 65
permeation data, 11, 146
physiologic strain in
fully encapsulated
clothing, 51
pressure testing, 65
Test methods, field (continued)

standards
ASTM Committee F-23 activities, 7, 245
National Fire Protective Association, 245
OSHA 29 CFR, 65

Test methods, laboratory
ammonia intrusion, 65
breaking strength of fabrics exposed to propellants, 185
breakthrough testing, 113
decontamination, 102
flammability, 86
fully encapsulated clothing, 65, 174, 185, 195, 215
heat stress, 41, 51
minimum detectable penetration rate, 265
overall garment, 245
permeation rates (See Permeation)
physical properties (See Physical properties of protective clothing materials)
pressure testing, 65

standards
ASTM Committee F-23 activities, 7, 245
National Fire Protective Association, 245
OSHA 29 CFR, 65
static pressure leak method, 65
thermal aging, 86
thermal protection, 86
visual inspection method, 65

Thermal effects on materials, 86, 132
Thermal protection, 86
Thermal stress, 41, 51
Triboelectric charge accumulation, 23
2,4-D, 157
Tyvek, pesticide permeation through, 146
Viton, 146, 195
Xylene solvents, 146
