Subject Index

A

Acaricides, 254
Adeguants, 92, 113, 271
Aerial spraying, 211, 283
Agglomeration, 128
Agricultural chemicals (See Fungicides; Herbicides; Insecticides; Pesticides)
Air-assist nozzle, 264
Air atomization, 155
Airblast sprayers, 254
Alternaria cassiae, 264
Aminocarb spray mixture, 211
Antisapstain formulations, 193
Application systems (See also Sprayer design)
formulation, droplet size, and spatial distribution effects, 145
historical changes, 5
Simplex seeder, modified for aerial spraying, 285
ultra-low volume, 155, 193
Aqueous formulations, 65
ASTM standards
D 547-41: 99
D 4331-84: 99
D 4532-85: 99
F 25-68: 99
F 50-83: 99
Atomization, 155
Atomizers (See Also Sprayer design)
electrostatic, 155, 193
spray characterization by light probes, 172

B

Bacillus thuringiensis, 46
Bacteria, 46
Bees, honey, 277
1,2-Benzisothiazolin-3-one, 65
Biocontrol of weeds, 264
Black flies, 46

C

Carrier volumes, reduced, 42
Cassia obtusifolia, 264
Charged droplets, 155, 193
Chemical volumes, reduced, 42
Chlorpyrifos, 40
Citrus rust mite control, 254
Coacervation, 25
Cockroaches, 277
Colorimetry, 254
Compacting systems, 128
Contaminating organisms, 65
Copper tracer, 254
Corn borer, 46
Crop canopy architecture, 155

D

Deposit patterns, 145, 225
Deposition, spray volume effects on, 42, 155, 193, 254
Diatomites, 98
Dipel, 46
Distribution systems (See Spray distribution)
Dose transfer, 145, 155
Drift, 242
Droplet charge, 155, 193
Droplet deposit patterns, 145, 225
Droplet size distribution characterization, 172
dose transfer, effect on, 145, 155
ground deposit from aerial spraying, effect on, 211
polymeric adjuvants, effect on, 225
Dust measurement, 98

E

Electrostatic spraying, 155, 193
Emulsions
emulsifiable concentrates, 13, 36, 77
invert, 264
macroemulsions, 36
microemulsions, 36
microencapsulation, 25
stability, 77
Entomopathogens, 46
EPA regulatory considerations, 65

F
Flowables, 65, 114
Foliar concentration, 211
Forestry management, 211, 283
Formaldehyde, 65
Formulation (See also
Herbicides;
Insecticides;
Pesticides)
antisapstain, 193
aqueous, 65
dose transfer, effect on, 145
droplet size, 145, 211
historical changes, 5
microbial, 46
microemulsions, 36
microencapsulation, 25
polymeric adjuvants, 225
principles, 13
surfactant quality control, 89
triangular coordinate plots, 36, 77
types, table, 19
Forward-scattering spectrometer probes, 172
Fungicides, 193

G
Granulation and granulating systems, 128, 283
Ground deposit, 211

H
Hemlock looper, 46
Herbicides (See also
Formulation)
Alternaria cassiae, 264

Herbicides (Continued)
antisapstain, 193
aqueous, 65
granular, 283
microencapsulation, high concentration, 25
mycoherbicides, 264
sicklepod, 264
Hornet, 98
Hornet and wasp spray, 277

I
Insect tape, 277
Insecticides (See also
Formulation)
adjuvants, 271
black flies, 46
cockroaches, 277
hemlock looper, 46
hornet and wasp, 277
insect tape, 277
microencapsulation, high concentration, 25
mites, 145, 254
mosquitoes, 46
placement, 277
Simulium spp., 46
Interfacial polymerization, 25

L
Light probes, 172
Lumber protection, 193

M
Macroemulsions, 36
Manufacturing equipment, 128
Microbes, 46
Microbial challenge testing, 65
Microbial formulations (See
Formulation;
Pesticides)
Macroemulsions, 36
Microencapsulation, 25
Mineral oils, 113, 271
Mites, 145, 254
Montmorillonites, 98
Mosquitoes, 46
Mycoherbicides, 264

| parathion, 271                | nozzles, air assist, 264 |
| permethrin, 271               | shrouding effects, 242 |
| preservatives, 65             | spatial effects, 145 |
| surfactant quality control, 89| volume effects, 42, 155, 193, 254 |
| Petroleum oils, 113, 271      | Spray mixtures (See also Emulsions) |
| Phase diagrams, 36            | characterization by light probes, 172 |
| Phytotoxicity, 113            | charged, 155, 193   |
| Plant oils, 271               | flowables, 65, 114  |
| Plastics, 277                 | fungicides, 193     |
| Polymerization, interfacial, 25| Newtonian, 225      |
| Preservatives, 65             | physical properties, 211 |
| Pronone 10G granular          | pseudoplastic, 225  |
| herbicide, 283                | Sprayer design     |
| Pseudoplastic behavior, 225   | airblast, 254       |
| Q                              | electrostatic, 155, 193 |
| Quality control of surfactants | nozzle orientation, 155 |
|                              | shrouding, 242      |
|                              | Simplex seeder, modified for aerial spraying, 285 |
Spraying, aerial, 211, 283
Spraying, low volume, 254
Stick, of petroleum oils, 113
Stress cracking, 277
Surface tension, 225
Surfactants, 36, 89

T
Telecommunications industry, 277
Ternary phase diagrams, 36
Testing dust measurement, 98
microbial challenge, 65
pest control in the telecommunications industry, 277
quality control of surfactants, 89
Toxicity, 271
Triangular coordinate plots, 36, 77

V
Vectobac, 46
Viscosity of spray mixtures, 225
Volutility of spray mixtures, 225

W
Wasp and hornet spray, 277
Weeds, biocontrol of, 264
(See also Herbicides)
Wetting, 113
Wood-protecting fungicides, 193
