Foreword

The Symposium on Engineering Properties of Roofing Systems was presented in three sessions during the 69th Annual Meeting of the Society, in Atlantic City, N.J., 26 June–1 July, 1966. The symposium was sponsored by Committee D-8 on Bituminous and Other Organic Materials for Roofing, Waterproofing, and Related Building or Industrial Uses. Symposium chairman was P. M. Jones, National Research Council of Canada. Presiding at the three sessions were Mr. Jones; M. M. Marshall, Facilities Engineering Command, U.S. Navy; and M. E. Jacoby, Owens-Corning Fiberglas Corp.

Contents

Introduction .............................................. 1
Roof Flashings and Their Problems—W. H. GUMPERTZ .......... 4
Tear Tests for Fluid-Applied Roofing Membranes at Joint in Roof Deck—MICHIO KOIKE ........................................ 26
Discussion ............................................ 40
Moisture-Thermal Effects Produce Erratic Motions in Built-Up Roofing—E. C. SHUMAN ......................................... 41
Discussion ............................................ 67
Effects of Temperature and Humidity on Linear Dimensions of Roofing Felt Laminates—E. G. LONG ................................... 71
Load-Strain Properties and Splitting of Roof Membranes—P. M. JONES 78
Strength-Thickness Relations of Solid-Asphalt-Solid Systems—K. MAIDZADEH AND M. HERRIN ......................... 91
Discussion ............................................ 105
Wind-Resistance Tests of Roof Shingles and Roof Assemblies—I. A. BENJAMIN AND J. A. BONO ............................... 110
Discussion ............................................ 138
Taped Joints for Roof Insulation—D. E. RICHARDS .................. 139
Discussion ............................................ 150
Discussion ............................................ 162
Wind-Uplift Resistance of Built-Up Roofs—J. W. DONEGAN AND W. L. BUTTERFIELD ........................................ 164
Discussion ............................................ 171
Rupture of Built-Up Roofing Components—K. G. MARTIN .......... 172
The Effects of Moisture on Built-Up Roofing Membranes—KENNETH TATOR AND S. H. ALEXANDER ......................... 187
Discussion ............................................ 202
Summary ................................................ 205
