SYMPOSIUM ON AIR-POLLUTION MEASUREMENT METHODS

Presented at the
FOURTH PACIFIC AREA NATIONAL MEETING
AMERICAN SOCIETY FOR TESTING AND MATERIALS
Los Angeles, Calif., October 5, 1962

ASTM Special Technical Publication No. 352

Price $3.75; to Members $2.60

Published by the
AMERICAN SOCIETY FOR TESTING AND MATERIALS
FOREWORD

The papers in the Symposium on Air-Pollution Measurement Methods were presented on Oct. 5, 1962 at the Fourth Pacific Area National Meeting of the Society held in Los Angeles, Calif. This Symposium was sponsored by the West Coast Technical Program Committee with A. T. Rossano, Jr., University of Washington, Seattle, Wash., as the presiding officer.
NOTE.—The Society is not responsible, as a body, for the statements and opinions advanced in this publication.
CONTENTS

Introduction—A. T. Rossano, Jr. .......................................................... 1
Particulate Air Pollutants Resulting from Combustion—Bernard D. Tebbens,
   Jerome F. Thomas, and Mitsugi Mukai ........................................ 3
Design Considerations of a Photochemical-Atmosphere Environmental Test Facility—
   Frank Bonamassa ................................................................... 32
Determination of Size and Mass Distribution of Aerosols—A. Goetz and T. Kallai .. 40
Determination of Small Quantities of Nitric Oxide and Nitrogen Dioxide in Nitrogen
   by Gas Chromatography—M. Fossard, R. G. Rinker, and W. H. Corcoran .. 56
Concentration of Fine Particles and Lead in Car Exhaust—P. K. Mueller, H. L.
   Helwig, A. E. Alcocer, W. K. Gong, and E. E. Jones ........................ 60
Discussion ................................................................................. 74
RELATED ASTM PUBLICATIONS

Odor, STP 164 (1954)
Instrumentation in Atmospheric Analysis, STP 250 (1958)
Air Pollution Control, STP 281 (1959)
This publication is one of many issued by the American Society for Testing and Materials in connection with its work of promoting knowledge of the properties of materials and developing standard specifications and tests for materials. Much of the data result from the voluntary contributions of many of the country's leading technical authorities from industry, scientific agencies, and government.

Over the years the Society has published many technical symposiums, reports, and special books. These may consist of a series of technical papers, reports by the ASTM technical committees, or compilations of data developed in special Society groups with many organizations cooperating. A list of ASTM publications and information on the work of the Society will be furnished on request.
