FOREWORD

The papers and discussions included in this volume were presented as a Symposium on Thermal Insulating Materials held at the 1951 Spring Meeting of the American Society for Testing Materials in Cincinnati, Ohio, March 7, 1951.

The Symposium was sponsored by ASTM Technical Committee C-16 on Thermal Insulating Materials through a Special Symposium Committee headed by Mr. Ray Thomas, Staff Engineer, Carbide and Carbon Chemicals Co., Division of Union Carbide and Carbon Corp., South Charleston, W. Va. Mr. C. B. Bradley, Johns-Manville Corp., acted as Technical Chairman of the symposium session.
NOTE.—The Society is not responsible, as a body, for the statements and opinions advanced in this publication.
CONTENTS

Introduction—Ray Thomas .................................................. 1

Basic Concepts of Water Vapor Migration and Their Application to Frame Walls—
F. A. Joy ................................................................. 2

Discussion ................................................................. 12

Theory of, and Appropriate Methods for Measurement of Surface Emittance—L. P.
Herrington ................................................................. 17

Discussion ................................................................. 27

Methods of Measurement and Application of the Theory of Specific Heat to Thermal
Insulating Materials—Norman H. Spear .................................. 28

Interlaboratory Comparison of Thermal Conductivity Determinations with Guarded
Hot Plates—Henry E. Robinson and Thomas W. Watson .................. 36

Discussion ................................................................. 44

Experiments with a Guarded Hot Plate Thermal Conductivity Set—C. F. Gilbo ... 45

Discussion ................................................................. 56
This publication is one of many issued by the American Society for Testing Materials in connection with its work of promoting knowledge of the properties of materials and developing standard specifications and tests for materials. Over the years the Society has published many technical symposiums, reports, and special books. These may consist of a series of technical papers, reports by the A.S.T.M. technical committees, or compilations of data developed in special Society groups with many organizations cooperating. A list of A.S.T.M. publications and information on the work of the Society will be furnished on request.
