PAPERS ON
INDUSTRIAL WATER AND
INDUSTRIAL WASTE WATER

Presented at the
SIXTY-FIFTH ANNUAL MEETING
AND
FOURTH PACIFIC AREA NATIONAL MEETING
AMERICAN SOCIETY FOR TESTING AND MATERIALS

ASTM Special Technical Publication No. 337

Price $3.00; to Members $2.40

Published by the
AMERICAN SOCIETY FOR TESTING AND MATERIALS
FOREWORD

This volume combines papers presented during 1962 at two sessions sponsored by ASTM Committee D-19 on Industrial Water. The first six papers were presented at the Session on Water and Industrial Waste Water on June 28 at the Sixty-fifth Annual Meeting of the Society held in New York City, June 24–29, 1962. John E. Kinney, sanitary engineering consultant, served as chairman.

The last two papers were presented at the Symposium on Industrial Water on Oct. 4 at the Society's Fourth Pacific Area National Meeting in Los Angeles, Calif., Sept. 30–Oct. 5, 1962. Presiding officers of this session were D. H. Price, Nalco Chemical Co., and Jack Korenthal, Los Angeles Department of Water and Power.
NOTE.—The Society is not responsible, as a body, for the statements and opinions advanced in this publication.
CONTENTS

Introduction—J. E. Kinney .................................................. 1
Handling and Analysis of Routine Water Samples in Volume—S. Sussman, I. L. Portnoy, and J. Jacobson ........................................... 6
Water—Raw Material for Utilities Steam Generation—A. C. Muller .......... 14
Thermal Loading of Streams—R. D. Hoak ........................................ 20
Discussion ........................................................................... 29
Analytical Methods and Instrumentation for Determining Cyanogen Compounds—L. E. Lancy and Walter Zabban .. 32
Gas Chromatographic Analysis of Aqueous Solutions—R. A. Baker ........ 46
Two Methods for the Determination of Nitrates in Water—Eugene Goldman .... 57
Continuous Automatic Boiler Water Silica Analysis—R. C. Allen .......... 67
THIS PUBLICATION is one of many issued by the American Society for Testing and Materials in connection with its work of promoting knowledge of the properties of materials and developing standard specifications and tests for materials. Much of the data result from the voluntary contributions of many of the country's leading technical authorities from industry, scientific agencies, and government.

Over the years the Society has published many technical symposiums, reports, and special books. These may consist of a series of technical papers, reports by the ASTM technical committees, or compilations of data developed in special Society groups with many organizations cooperating. A list of ASTM publications and information on the work of the Society will be furnished on request.
