ELECTRON MICROFRACTOGRAPHY

ASTM SPECIAL TECHNICAL PUBLICATION 453

List price $16.00

AMERICAN SOCIETY FOR TESTING AND MATERIALS 1916 Race Street, Philadelphia, Pa. 19103
NOTE

The Society is not responsible, as a body, for the statements and opinions advanced in this publication.
Foreword

The Symposium on Electron Microfractography was presented during the Seventy-first Annual Meeting of the Society, in San Francisco, Calif., 23-28 June 1968. The symposium was sponsored by Subcommittee II on Fractography of ASTM Committee E-24 on Fracture Testing of Metals. The chairman of this symposium was A. J. Brothers, General Electric Co.

Contents

Introduction .............................................................................. 1
Relationship Between Precipitation and Dimple Fracture in an
18 Percent Nickel Maraging Steel—L. Roesch and
G. Henry ........................................................................... 3
Discussion ............................................................................. 30
Fractographic Studies on the Cleavage Fracture of Single
Crystals of Iron—K. Kitajima and K. Futagami ......................... 33
Fractographic Studies of Crack-Tip Zones in a Structural
Steel—D. M. Fegredo .............................................................. 60
Correlations Between Fractographic Features and Plane-Strain
Fracture Toughness in an Ultrahigh-Strength Steel—
W. A. Spitzig ....................................................................... 90
A Comparison of Elevated Temperature Tensile Fractures in
Nonleaded and Leaded 4145 Steel—R. D. Zipp,
W. R. Warke, and N. N. Breyer ............................................... 111
Use of Electron Microfractography in Interpreting the
Mechanisms of Fatigue Crack Propagation—K. D. Nair
and I. Le May .................................................................. 134
Fracture Surface and Processes in Polycarbonate—G. H. Jacoby 147
A Fractographic Study of Precipitation Hardened and Dispersion
Strengthened Magnesium-Base Alloys—C. D. Calhoun and
N. S. Stoloff .................................................................... 173
Discussion ........................................................................... 191
Correlation of Fractographic Features With Fracture Mechanics
Data—R. C. Bates, W. G. Clark, Jr., and D. M. Moon ............ 192
The Influence of Microstructure on the Fracture Topography of
Titanium Alloys—J. C. Williams, R. R. Boyer, and
M. J. Blackburn ................................................................ 215
