SYMPOSIUM ON
RADIOACTIVITY—AN
INTRODUCTION
(RADIOISOTOPES—LABORATORIES—PERSONNEL—RADIATION—MANAGEMENT
PROBLEMS—ASTM WORK)

Presented at the
FIFTY-SIXTH ANNUAL MEETING
AMERICAN SOCIETY FOR TESTING MATERIALS
Atlantic City, N. J., June 30, 1953

ASTM Special Technical Publication No. 159

Published by the
AMERICAN SOCIETY FOR TESTING MATERIALS
CONTENTS

Foreword and Introduction—S. Edward Eaton ............................................. 1
Properties and Uses of Radioisotopes—G. D. Calkins .................................. 3
Applications of Radioactive Measurements to ASTM Work—O. M. Elliott and J. L. Kuranz ................................................................. 9
Design of Radioisotope Laboratories for Low and Intermediate Levels of Activity—
G. G. Manov and O. M. Bizzell ................................................................. 17
Training Personnel in Radioisotope Techniques—Donald R. Smith .................. 28
Nuclear Radiation—Its Detection and Measurement—Ernest H. Wakefield ........ 30
Management Problems Resulting from Radioisotope Utilization by Industry—W. L.
Davidson ................................................................................................. 40
NOTE.—The Society is not responsible, as a body, for the statements and opinions advanced in this publication.
THIS PUBLICATION is one of many issued by the American Society for Testing Materials in connection with its work of promoting knowledge of the properties of materials and developing standard specifications and tests for materials. Over the years the Society has published many technical symposiums, reports, and special books. These may consist of a series of technical papers, reports by the A.S.T.M. technical committees, or compilations of data developed in special Society groups with many organizations cooperating. A list of A.S.T.M. publications and information on the work of the Society will be furnished on request.
